Title of Collection: Parent Information
and School Choice Evaluation.

OMB Control Number: 1850-NEW.

Type of Review: A new information
collection.

Respondents/Affected Public:
Individuals or Households.

*Total Estimated Number of Annual
Responses:* 3,525.

*Total Estimated Number of Annual
Burden Hours:* 2,306.

Abstract: Sponsored by the Institute
of Education Sciences (IES), U.S.
Department of Education, the Parent
Information and School Choice
Evaluation (PISCE) is an important first
step toward filling the wide gap in
knowledge about how to present school
choice information to parents. This
research is needed to provide guidance
to districts where school choice is
expanding. PISCE seeks to identify the
format, amount, and organization of
information that is most comprehensible
and usable to parents. The study will
target low-income parents of school-age
children and will evaluate perceptions
of different presentations of school
information. The results of the study
will be used to create a reader-friendly
guide for school districts.

IES has contracted with Mathematica
Policy Research to conduct the needed
research. Most of the experiment will be
conducted with members of a standing
panel who already complete surveys on
a regular basis for a variety of purposes.
This approach provides a low-cost and
quick turnaround method to obtain
findings related to the understandability
of school choice information, which
does not require respondents to be
making actual school choices for their
children. To enhance what can be
learned from the standing panel, the
research team also intends to recruit a
sample of low-income parents of school-
age children from locations where a
public school choice marketplace with
unified enrollment has been active for at
least two years. Parents who have
experienced public school choice or are
at least exposed to open enrollment in
their district may experience the
experiment differently than the standing
