SUPPLEMENTARY INFORMATION: This ICR seeks to extend PRA authority for the Explosive Materials and Blasting Units in Metal and Nonmetal Underground Gassy Mines information collection. Under regulations 30 CFR parts 7 and 15, the MSHA evaluates and approves explosive materials and blasting units as permissible for use in the mining industry; however, since there are no permissible explosives or blasting units available that have adequate blasting capacity for some metal and nonmetal gassy mines, regulations 30 CFR 57.22606(a) outlines the procedures for a mine operator to follow when using non-approved explosive materials and blasting units. The standard requires the mine operator of a Class III metal or nonmetal mine (gassy mine) to notify the MSHA in writing prior to the use of any non-approved explosive materials and blasting units. The MSHA then evaluates the non-approved explosive materials and determines whether they are safe for use in a potentially gassy environment. Federal Mine Safety and Health Act of 1977 sections 101(a) and 103(h) authorize this information collection. See 30 U.S.C. 811(a), 813(h).

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is

approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. See 5 CFR 1320.5(a) and 1320.6. The DOL obtains OMB approval for this information collection under Control Number 1219-0095.

OMB authorization for an ICR cannot be for more than three (3) years without renewal, and the DOL seeks to extend PRA authorization for this information collection for three (3) more years, without any change to existing requirements. The DOL notes that existing information collection requirements submitted to the OMB receive a month-to-month extension while they undergo review. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on August 3, 2015 (80 FR 46056).

Interested parties are encouraged to send comments to the OMB, Office of Information and Regulatory Affairs at the address shown in the **ADDRESSES** section within thirty (30) days of publication of this notice in the **Federal Register**. In order to help ensure appropriate consideration, comments should mention OMB Control Number 1219-0095. The OMB is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.
