SUPPLEMENTARY INFORMATION: Originally under the direction of Homeland Security Presidential Directive-7 (HSPD-7) (2003) and now under the authority of Presidential Policy Directive 21 (PPD-21) (2013), DHS/NPPD/IP has developed the IP Gateway—a centrally managed repository of infrastructure capabilities allowing the Critical Infrastructure (CI) community to work in conjunction with each other toward the same goals. This collection involves the standardized recording, via a series of web-based forms, of a significant amount of information assembled during voluntary physical facility review surveys. The survey is used to analyze risks and vulnerabilities to a facility and how they can mitigate risks and vulnerabilities. Questions focus on whether specific sets of controls and operational best

practices are planned, defined, implemented, measured, managed, and assessed on a regular basis across all aspects of facility use and operation. Surveys are usually completed by government personnel, but can be performed by individual site owners as well.
