SUPPLEMENTARY INFORMATION:

Title: FERC-725J, Definition of the Bulk Electric System

OMB Control No.: 1902-0259

Type of Request: Three-year extension of the FERC-725J information collection requirements with no changes to the current reporting requirements.

Abstract: On December 20, 2012, the Commission issued Order No. 773, a Final Rule approving NERC's modifications to the definition of "bulk electric system" and the Rules of Procedure exception process to be effective July 1, 2013. On April 18, 2013, in Order No. 773-A, the Commission largely affirmed its findings in Order No. 773. In Order Nos. 773 and 773-A, the Commission directed NERC to modify the definition of bulk electric system in two respects: (1) Modify the local network exclusion (exclusion E3) to remove the 100 kV minimum operating voltage to allow systems that include one or more looped configurations connected below 100 kV to be eligible for the local network exclusion; and (2) modify the exclusions to ensure that generator interconnection facilities at or above 100 kV connected to bulk electric system generators identified in inclusion I2 are not excluded from the bulk electric system.

Type of Respondents: Generator owners, distribution providers, other NERC-registered entities.

Estimate of Annual Burden:¹ The Commission estimates the annual public reporting burden for the information collection as:

FERC-725J (DEFINITION OF THE BULK ELECTRIC SYSTEM)

	Number of respondents (1)	Annual number of responses per respondent (2)	Total number of responses (1)*(2)=(3)	Average burden and cost per response ² (4)	Total annual burden hours and total annual cost (3)*(4)=(5)	Cost per respondent (\$) (5)÷(1)
Generator Owners and Distribution Providers (Exception Request)	20	1	20	94 hrs.; \$5,864	1,880 hrs.; \$117,274	\$5,864
All Registered Entities (Implementation Plans and Compliance)	186	1	186	350 hrs.; \$21,833	65,100 hrs.; \$4,060,938	\$21,833
Total	206	66,980 hrs.; \$4,178,212	\$27,697

Comments: Comments are invited on: (1) Whether the collection of information is necessary for the proper performance of the functions of the

Commission, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden and cost of the collection

of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collection;

¹ The Commission defines burden as the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. For further explanation of what is included in the

information collection burden, reference 5 Code of Federal Regulations 1320.3.

² The estimates for cost per response are derived using the following formula: Average Burden Hours per Response * \$62.38/hour = Average Cost per

Response. The hourly cost figure (wages plus benefits) comes from the Bureau of Labor Statistics (http://www.bls.gov/oes/current/naics2_22.htm). The figure is for an electric engineer (Occupational Code: 17-2071).

and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Dated: February 18, 2016.

Deputy Secretary.
