Background

The Middle Class Tax Relief and Job Creation Act of 2012 (Pub. L. 112–96, Title VI, 126 Stat. 156 (codified at 47 U.S.C. 1401 *et seq.*)) (the “Act”) created and authorized FirstNet to take all actions necessary to ensure the building, deployment, and operation of an interoperable, nationwide public safety broadband network (“NPSBN”) based on a single, national network architecture. The Act meets a longstanding and critical national infrastructure need, to create a single, nationwide network that will, for the first time, allow police officers, fire fighters, emergency medical service professionals, and other public safety entities to effectively communicate with each other across agencies and jurisdictions. The NPSBN is intended to enhance the ability of the public safety community to perform more reliably, effectively, and safely; increase situational awareness during an emergency; and improve the ability of the public safety community to effectively engage in those critical activities.

The National Environmental Policy Act of 1969 (42 U.S.C. 4321–4347)

(“NEPA”) requires federal agencies to undertake an assessment of environmental effects of their proposed actions prior to making a final decision and implementing the action. NEPA requirements apply to any federal project, decision, or action that may have a significant impact on the quality of the human environment. NEPA also establishes the Council on Environmental Quality (“CEQ”), which issued regulations implementing the procedural provisions of NEPA (see 40 CFR parts 1500–1508). Among other considerations, CEQ regulations at 40 CFR 1508.28 recommend the use of *tiering* from a “broader environmental impact statement (such as a national program or policy statements) with subsequent narrower statements or environmental analysis (such as regional or basin wide statements or ultimately site-specific statements) incorporating by reference the general discussions and concentrating solely on the issues specific to the statement subsequently prepared.”

Due to the geographic scope of FirstNet (all 50 states, the District of Columbia, and five territories) and the diversity of ecosystems potentially traversed by the project, FirstNet has elected to prepare five regional PEISs. The five PEISs will be divided into the East, Central, West, South, and Non-Contiguous Regions. The Non-Contiguous Region consists of Alaska, Hawaii, American Samoa, Guam, the Northern Mariana Islands, Puerto Rico, and the U.S. Virgin Islands. The Draft PEIS analyzes potential impacts of the deployment and operation of the NPSBN on the natural and human environment in the Non-Contiguous Region, in accordance with FirstNet’s responsibilities under NEPA.

Next Steps

All comments received by the public and any interested stakeholders will be evaluated and considered by FirstNet during the preparation of the Final PEIS. Once a PEIS is completed and a Record of Decision (ROD) is signed, FirstNet will evaluate site-specific documentation, as network design is developed, to determine if the proposed project has been adequately evaluated in the PEIS or warrants a Categorical Exclusion, an Environmental Assessment, or an Environmental Impact Statement.

Dated: March 1, 2016.

Amanda Goebel Pereira,

NEPA Coordinator First Responder Network Authority.

Foreign-Trade Zones Board

[B–11–2016]

Foreign-Trade Zone 230—Piedmont Triad Area, North Carolina; Notification of Proposed Production Activity; United Chemi-Con, Inc.; Subzone 230A (Aluminum Electrolytic Capacitors); Lansing, North Carolina

The Piedmont Triad Partnership, grantee of FTZ 230, submitted a notification of proposed production activity to the FTZ Board on behalf of United Chemi-Con, Inc. (UCC), operator of Subzone 230A, at its facility located in Lansing, North Carolina. The notification conforming to the requirements of the regulations of the FTZ Board (15 CFR 400.22) was received on February 26, 2016.

UCC already has authority to produce aluminum electrolytic capacitors within Subzone 230A. The current request would add new foreign components to the scope of authority. Pursuant to 15 CFR 400.14(b), FTZ activity would be limited to the specific foreign-status components and specific finished products described in the submitted notification (as described below) and subsequently authorized by the FTZ Board.

Production under FTZ procedures could exempt UCC from customs duty payments on the foreign status components used in export production. On its domestic sales, UCC would be able to choose the duty rate during customs entry procedures that applies to aluminum electrolytic capacitors (free) for the foreign status inputs noted below and in the existing scope of authority. Customs duties also could possibly be deferred or reduced on foreign status production equipment.

The components sourced from abroad are: Boric acid; D-Mannitol; polyoxy ethylene glycol; polyvinyl/p-nitrobenzy alcohol; ammonium benzoate; adipic acid; ammonium adipate; maleic acid; gamma resorcylic acid; isomeric decanedicarboxylic & 1,2,3,4-butanetracarboxylic; polyethylene glycol phosphate; KIP (gamma-butyrolactone & 1-ethyl-2,3-dimethylimidazolinium hydrogen phthalate mixture); PEG1000 polyethylene glycol; MMA–10R (carbolic acid mixture); wax poly white; silicone oil; polypropylene tape; sleeving and nuts of plastic; end disks; gaskets of ethylene propylene diene monomer; steel screws/nuts/hexes; aluminum waste/scrap/tab stock/foil/inserts/rivets/washers/springs/lock washers; and, metal clamps and
