SUPPLEMENTARY INFORMATION: This ICR seeks to extend PRA authority for the Gamma Radiation Surveys information collection codified in regulations 30 CFR 57.5047 that requires a covered mine operator to maintain a record of cumulative individual gamma radiation exposure to ensure that annual exposure does not exceed five (5) Rems. This requirement protects the health of workers in mines with radioactive ores. Federal Mine Safety & Health Act sections 101(a) and 103(c) and (h)

authorize this information collection. See 30 U.S.C. 811(a), 813(c), and 813(h).

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. See 5 CFR 1320.5(a) and 1320.6. The DOL obtains OMB approval for this information collection under Control Number 1219-0039.

OMB authorization for an ICR cannot be for more than three (3) years without renewal, and the current approval for this collection is scheduled to expire on March 31, 2016. The DOL seeks to extend PRA authorization for this information collection for three (3) more years, without any change to existing requirements. The DOL notes that existing information collection requirements submitted to the OMB receive a month-to-month extension while they undergo review. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on September 23, 2016 (80 FR 57400).

Interested parties are encouraged to send comments to the OMB, Office of Information and Regulatory Affairs at the address shown in the **ADDRESSES** section within thirty (30) days of publication of this notice in the **Federal Register**. In order to help ensure appropriate consideration, comments should mention OMB Control Number 1219-0039. The OMB is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology,

The interviews would gather detailed documentation of how states operate their UI call centers, as well as gather information on how existing state UI call centers' successful practices and measurable performances are used. Social Security Act section 303(a)(6) authorizes this information collection. See 42 U.S.C. 503(a)(6).
