

Because the commercial AM has not been triggered in 2016, this is only for the recreational sector. The commercial quota for Atlantic migratory group cobia is 50,000 lb (22,680 kg), round weight, for the current fishing year, January 1 through December 31, 2016, as specified in 50 CFR 622.384(d)(2). The sale or purchase of Atlantic migratory group cobia taken under the possession limit is allowed until the commercial quota is reached or is projected to be reached. If cobia landings that are sold reach or are projected to reach the commercial quota specified in § 622.384(d)(2), the Assistant Administrator for Fisheries, NOAA (AA), will file a notification with the Office of the Federal Register to prohibit the sale and purchase of cobia for the remainder of the fishing year through December 31, 2016.

Classification

The Regional Administrator, Southeast Region, NMFS, has determined this temporary rule is necessary for the conservation and management of Atlantic migratory group cobia and is consistent with the Magnuson-Stevens Act and other applicable laws.

This action is taken under 50 CFR 622.388(f)(2) and is exempt from review under Executive Order 12866.

These measures are exempt from the procedures of the Regulatory Flexibility Act because the temporary rule is issued without opportunity for prior notice and comment.

This action is based on the best scientific information available. The AA finds good cause to waive the requirements to provide prior notice and opportunity for public comment, pursuant to the authority set forth at 5 U.S.C. 553(b)(B), as such prior notice and opportunity for public comment is unnecessary and contrary to the public interest. Such procedures are unnecessary and contrary to the public interest because the AMs for Atlantic migratory group cobia established by Amendment 18 to the FMP, and located at 50 CFR 622.388(f)(1)(i), have already been subject to notice and comment, and all that remains is to notify the public of the recreational closure in the 2016 fishing year. Prior notice and opportunity for public comment on this action would be contrary to the public interest, because many of those affected by the length of the recreational fishing season, particularly charter vessel and headboat operations that book trips for clients in advance, need as much advance notice as NMFS is able to provide to adjust their business plans to account for the reduced recreational fishing season.

For the aforementioned reasons, the AA also finds good cause to waive the 30-day delay in the effectiveness of this action under 5 U.S.C. 553(d)(3).

Authority: 16 U.S.C. 1801 *et seq.*

Dated: March 7, 2016.

RIN 0648-XE484

Atlantic Highly Migratory Species; Commercial Blacktip Sharks, Aggregated Large Coastal Sharks, and Hammerhead Sharks in the Western Gulf of Mexico Sub-Region

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; closure.

SUMMARY: NMFS is closing the commercial fishery for blacktip sharks and the aggregated large coastal sharks (LCS) and hammerhead shark management groups in the western Gulf of Mexico sub-region. This action is necessary because the commercial landings of aggregated LCS and hammerhead sharks in the western Gulf of Mexico sub-region for the 2016 fishing season have exceeded 80 percent of the available commercial quota as of March 4, 2016, and the aggregated LCS and hammerhead shark management groups are quota-linked under the current regulations. The blacktip shark fishery in the western Gulf of Mexico sub-region will be closed to minimize regulatory discards of aggregate LCS in the western Gulf of Mexico sub-region, which are often caught in conjunction with blacktip sharks in the commercial shark fisheries. This closure will affect anyone commercially fishing for sharks in the western Gulf of Mexico sub-region.

DATES: The commercial fishery for blacktip sharks and the aggregated LCS and hammerhead shark management groups in the western Gulf of Mexico sub-region are closed effective 11:30 p.m. local time March 12, 2016, until the end of the 2016 fishing season on

December 31, 2016, or until and if NMFS announces via a notice in the **Federal Register** that additional quota is available and the season is reopened.

FOR FURTHER INFORMATION CONTACT: Guy DuBeck or Karyl Brewster-Geisz, 301-427-8503; fax 301-713-1917.

SUPPLEMENTARY INFORMATION: The Atlantic shark fisheries are managed under the 2006 Consolidated Highly Migratory Species (HMS) Fishery Management Plan (FMP), its amendments, and implementing regulations (50 CFR part 635) issued under authority of the Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1801 *et seq.*).

Under § 635.5(b)(1), dealers must electronically submit reports on sharks that are first received from a vessel on a weekly basis through a NMFS-approved electronic reporting system. Reports must be received by no later than midnight, local time, of the first Tuesday following the end of the reporting week unless the dealer is otherwise notified by NMFS. Under § 635.28(b)(4), the quotas of certain species and/or management groups are linked. If quotas are linked, when the specified quota threshold for one management group or species is reached and that management group or species is closed, the linked management group or species closes at the same time (§ 635.28(b)(3)). The quotas for aggregated LCS and the hammerhead shark management groups in the western Gulf of Mexico sub-region are linked (§ 635.28(b)(4)(iii)). The blacktip shark quota in the western Gulf of Mexico sub-region is not linked to the aggregated LCS or hammerhead shark quotas. Regulations at § 635.28(b)(2) and (b)(5) authorize the closure of the blacktip shark fishery in the Gulf of Mexico at a regional or sub-regional level when landings have reached or are expected to reach 80 percent of the quota or, after considering certain criteria and relevant factors, before those situations occur.

Under § 635.28(b)(2) and (3), when NMFS calculates that the landings for any species and/or management group of either a non-linked or a linked group have reached or are projected to reach a threshold of 80 percent of the available quota, NMFS will file for publication with the Office of the Federal Register a notice of closure for all of the species and/or management groups of either a non-linked or linked group that will be effective no fewer than 5 days from date of filing. From the effective date and time of the closure until and if NMFS announces, via a

notice in the **Federal Register**, that additional quota is available and the season is reopened, the fisheries for all linked species and/or management groups and specified non-linked species and/or management groups are closed, even across fishing years.

On December 1, 2015 (80 FR 74999), NMFS announced that for 2016, the commercial western Gulf of Mexico blacktip shark sub-regional quota was 266.5 metric tons (mt) dressed weight (dw) (587,396 lb dw), the western Gulf of Mexico aggregated LCS sub-regional quota was 72.0 mt dw (158,724 lb dw), and the western Gulf of Mexico hammerhead shark sub-regional quota was 11.9 mt dw (29,421 lb dw). Dealer reports recently received through March 4, 2016, indicate that 60.6 mt dw or 84 percent of the available western Gulf of Mexico aggregated LCS sub-regional quota has been landed, that 13.8 mt dw or 116 percent of the available western Gulf of Mexico hammerhead shark sub-regional quota has been landed, and that 134.1 mt dw or 50 percent of the available western Gulf of Mexico blacktip shark sub-regional quota has been landed. Based on these dealer reports, the 80-percent limits specified for a closure notice in the regulations for the aggregated LCS and hammerhead shark management groups in the western Gulf of Mexico sub-region were exceeded as of March 4, 2016. Accordingly, NMFS is closing the commercial aggregated LCS and hammerhead management groups in the western Gulf of Mexico sub-region as of 11:30 p.m. local time March 12, 2016.

Regarding blacktip sharks in the western Gulf of Mexico sub-region, regulations at § 635.28(b)(5)(i) through (v) authorize the closure of the blacktip shark fishery before landings reach, or are expected to reach, 80 percent of the quota after considering the following criteria and other relevant factors: Season length based on available sub-regional quota and average sub-regional catch rates; variability in regional and/or sub-regional seasonal distribution, abundance, and migratory patterns; effects on accomplishing the objectives of the 2006 Consolidated HMS FMP and its amendments; amount of remaining shark quotas in the relevant sub-region; and regional and/or sub-regional catch rates of the relevant shark species or management groups. NMFS considered all of these criteria with respect to blacktip sharks in the western Gulf of Mexico sub-region, and in particular, considered sub-regional distribution and abundance (§ 635.28(b)(5)(ii) and sub-regional catch rates (§ 635.28(b)(5)(v)). The directed shark fisheries in the western Gulf of Mexico

sub-region exhibit a mixed species composition, with a high abundance and distribution of aggregated LCS caught in conjunction with blacktip sharks. As a result, NMFS believes that closing the aggregated LCS and hammerhead shark management groups while leaving only the blacktip shark fishery open in the western Gulf of Mexico sub-region could cause large numbers of regulatory discards of aggregated LCS species. Such discards could hinder the management goals and interfere with accomplishing the objectives of the 2006 Consolidated HMS FMP and its amendments (§ 635.28(b)(5)(iii)), which include preventing overfishing while achieving on a continuing basis optimum yield and rebuilding overfished shark stocks. Such discards would also be contrary to National Standard 9, which requires that management measures minimize bycatch and bycatch mortality, particularly if the discards are dead and are of overfished species. A single closure for the aggregated LCS, blacktip, and hammerhead management groups in the western Gulf of Mexico sub-region would minimize regulatory discards, and help prevent overfishing, of aggregated LCS in the western Gulf of Mexico sub-region, consistent with the Magnuson-Stevens Fishery Conservation and Management Act and the criteria at § 635.28(b)(5). Accordingly, NMFS is closing the commercial blacktip shark fishery in the western Gulf of Mexico sub-region as of 11:30 p.m. local time March 12, 2016.

All other shark species or management groups in the western Gulf of Mexico sub-region that are currently open will remain open, including the commercial Gulf of Mexico non-blacknose small coastal sharks (SCS), blue sharks, and pelagic sharks other than porbeagle or blue.

At § 635.27(b)(1), the boundary between the Gulf of Mexico region and the Atlantic region is defined as a line beginning on the East Coast of Florida at the mainland at 25°20.4' N. lat, proceeding due east. Any water and land to the south and west of that boundary is considered for the purposes of monitoring and setting quotas, to be within the Gulf of Mexico region. The boundary between the western and eastern Gulf of Mexico sub-regions is drawn along 88°00' W. long. (§ 635.27(b)(1)(ii)).

During the closure, retention of blacktip sharks, aggregated LCS, and/or hammerhead sharks in the western Gulf of Mexico sub-region is prohibited for persons fishing aboard vessels issued a commercial shark limited access permit under § 635.4. However, persons aboard

a commercially permitted vessel that is also properly permitted to operate as a charter vessel or headboat for HMS and is engaged in a for-hire trip could fish under the recreational retention limits for sharks and “no sale” provisions (§ 635.22 (c)). Similarly, persons aboard a commercially permitted vessel that possesses a valid shark research permit under § 635.32 and has a NMFS-approved observer onboard may continue to harvest and sell blacktip sharks, aggregated LCS, and/or hammerhead sharks in the western Gulf of Mexico sub-region pursuant to the terms and conditions of the shark research permit.

During this closure, a shark dealer issued a permit pursuant to § 635.4 may not purchase or receive blacktip sharks, aggregated LCS, and/or hammerhead sharks in the western Gulf of Mexico sub-region from a vessel issued an Atlantic shark limited access permit (LAP), except that a permitted shark dealer or processor may possess blacktip sharks, aggregated LCS, and/or hammerhead sharks in the western Gulf of Mexico sub-region that were harvested, off-loaded, and sold, traded, or bartered prior to the effective date of the closure and were held in storage consistent with § 635.28(b)(5). Additionally, a permitted shark dealer or processor may possess blacktip sharks, aggregated LCS, and/or hammerhead sharks in the western Gulf of Mexico sub-region that were harvested by a vessel issued a valid shark research fishery permit per § 635.32 with a NMFS-approved observer onboard during the trip the sharks were taken on as long as the LCS research fishery quota remains open. Similarly, a shark dealer issued a permit pursuant to § 635.4 may, in accordance with relevant state regulations, purchase or receive blacktip sharks, aggregated LCS, and/or hammerhead sharks in the western Gulf of Mexico sub-region if the sharks were harvested, off-loaded, and sold, traded, or bartered from a vessel that fishes only in state waters and that has not been issued an Atlantic Shark LAP, HMS Angling permit, or HMS Charter/Headboat permit pursuant to § 635.4.

Classification

Pursuant to 5 U.S.C. 553(b)(B), the Assistant Administrator for Fisheries, NOAA (AA), finds that providing prior notice and public comment for this action is impracticable and contrary to the public interest because the fishery is currently underway and any delay in this action would result in overharvest of the quotas for these species and management groups and be inconsistent

with management requirements and objectives. Similarly, affording prior notice and opportunity for public comment on this action is contrary to the public interest because if a quota is exceeded, the stock may be negatively affected and fishermen ultimately could experience reductions in the available

quota and a lack of fishing opportunities in future seasons. For these reasons, the AA also finds good cause to waive the 30-day delay in effective date pursuant to 5 U.S.C. 553(d)(3). This action is required under § 635.28(b)(3) and § 635.28(b)(5) and is exempt from review under Executive Order 12866.
