[Docket No. EL16-47-000]

Pacific Gas and Electric Company; Notice of Petition for Declaratory Order

Take notice that on March 14, 2016, pursuant to Rule 207(a)(2) of the Federal Energy Regulatory Commission's (Commission) Rules of Practice and Procedure, 18 CFR 385.207(a)(2) (2014), Pacific Gas and Electric Company (Petitioner), filed a petition for declaratory order (petition) requesting transmission rate incentives for eight major capacity transmission projects (Projects) that have been approved under the transmission planning process of the California Independent System Operator Corporation and confirmation that the 50 basis adder applicable to its base return on equity for Regional Transmission Organization participation applies to these Projects, all as more fully explained in the petition.

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. Such notices, motions, or protests must be filed on or before the comment date. Anyone filing a motion to intervene or protest must serve a copy of that document on the Petitioner.

The Commission encourages electronic submission of protests and interventions in lieu of paper using the "eFiling" link at <http://www.ferc.gov>. Persons unable to file electronically should submit an original and 5 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426.

This filing is accessible on-line at <http://www.ferc.gov>, using the "eLibrary" link and is available for review in the Commission's Public Reference Room in Washington, DC. National Rivers and Streams Assessment 2008/2009 Final Report

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of availability.

SUMMARY: This notice announces the availability of EPA's final report on the National Rivers and Streams Assessment (NRSA) 2008/2009. The NRSA describes the results of the nationwide probabilistic survey that was conducted in the summers of 2008 and 2009 by EPA and its state, tribal, and federal partners. The NRSA 2008/2009 report includes information on how the survey was implemented, what the findings are on a national and ecoregional scale, and future actions and challenges.

FOR FURTHER INFORMATION CONTACT: Richard Mitchell, Office of Wetlands, Oceans and Watersheds, Office of Water, Washington, DC. Phone: 202-566-0644; email: mitchell.richard@epa.gov.

SUPPLEMENTARY INFORMATION:

I. General Information

The *National Rivers and Streams Assessment 2008-2009: A Collaborative Survey* is the first report to use a statistically-valid random design to assess the condition of the nation's rivers and streams. It is one of a series of National Aquatic Resource Surveys (NARS), a national-scale monitoring program designed to produce statistically-valid assessments that answer critical questions about the condition of waters in the United States. The key goals of the NRSA report are to describe the ecological and recreational condition of the nation's river and stream resources, how those conditions

are changing, and the key stressors affecting those waters. Using a statistical survey design, 1,924 sites were selected at random to represent the condition of the larger population of rivers and streams across the lower 48 states, from the largest "great rivers" to the smallest headwater streams.

The NRSA finds that 46% of the nation's river and stream miles do not support healthy biological communities when compared to least disturbed sites in similar ecological regions. Fair conditions are found in 25% of river and stream miles, while 28% are in good condition and support healthy aquatic communities. Of the stressors that were examined, phosphorus and nitrogen are the most widespread. Biological communities are at increased risk for poor condition when phosphorus and nitrogen levels are high. The report has undergone public, peer, state/tribal and EPA review.

A. How can I get copies of the NRSA 2008/2009 and other related information?

You may view and download the final report from EPA's Web site at <http://www.epa.gov/national-aquatic-resource-surveys/nrsa>.
