Magnuson-Stevens Fishery Conservation and Management Act; Seafood Import Monitoring Program

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule; extension of the comment period.

SUMMARY: The National Marine Fisheries Service (NMFS) is announcing an extension to the comment period for the proposed rule on a seafood import monitoring program published in the **Federal Register** on February 5, 2016. The comment period is being extended from April 5, 2016 to April 12, 2016. Pursuant to the Magnuson-Stevens Fishery Conservation and Management Act (MSA), this proposed rule would establish filing and recordkeeping procedures relating to the importation of certain fish and fish products, in order to implement the MSA’s prohibition on the import and trade, in interstate or foreign commerce, of fish taken, possessed, transported or sold in violation of any foreign law or regulation. The information to be filed is proposed to be collected at the time of entry, and makes use of an electronic single window consistent with the Safety and Accountability for Every (SAFE) Port Act of 2006 and other applicable statutes. Specifically, NMFS proposes to integrate collection of catch and landing documentation for certain

fish and fish products within the government-wide International Trade Data System (ITDS) and require electronic information collection through the Automated Commercial Environment (ACE) maintained by the Department of Homeland Security, Customs and Border Protection (CBP). Under these procedures, NMFS would require an annually renewable International Fisheries Trade Permit (IFTP) and specific data for certain fish and fish products to be filed and retained as a condition of import to enable the United States to exclude the entry into commerce of products of illegal fishing activities. The information to be collected and retained will help authorities verify that the fish or fish products were lawfully acquired by providing information that traces each import shipment from point of harvest to entry-into commerce. The rule will also decrease the incidence of seafood fraud by collecting information at import and requiring retention of documentation so that the information reported (e.g., regarding species and harvest location) can be verified. This proposed rule stipulates the catch and landing data for imports of certain fish and fish products which would be required to be submitted electronically to NMFS through ACE and the requirements for recordkeeping concerning such imports.

DATES: Written comments on the proposed rule published February 5, 2016 (81 FR 6210) must be received on or before April 12, 2016.
