

the U.S. Department of Agriculture, National Agriculture Statistics Service (NASS) for the following purposes: (a) To compute Parity Prices in accordance with requirements of the Agricultural Adjustment Act of 1938 as amended (Title III, Subtitle A, Section 301a), (b) to estimate value of production, inventory values, and cash receipts from farming, (c) to determine the level for farmer owned reserves, (d) to provide guidelines for Risk Management Agency price selection options, (e) to determine Federal disaster prices to be paid, (f) establishing USDA's net farm income projections by the Economic Research Service and (g) to determine the grazing fee on Federal lands. General authority for these data collection activities is granted under U.S. Code Title 7, Section 2204.

Need and Use of the Information: The NASS price program computes annual U.S. weighted average prices received by farmers for wheat, barley, oats, corn, grain sorghum, rice, cotton, peanuts, pulse crops and oilseeds based on monthly marketing. Estimates of prices received are used by NASS to determine the value of agricultural production. Prices estimates are used by many Government agencies as a general measure of commodity price changes, economic analysis relating to farm income and alternative marketing policies, and for disaster and insurance payments. NASS estimates based on these surveys are used as a Principle Economic Indicator of the United States. These price estimates are also used to compute Parity Prices in accordance with requirements of the Agricultural Adjustment Act of 1938 as amended (Title III, Subtitle A, Section 301(a)).

Description of Respondents: Farms; Business or other for-profit.

Number of Respondents: 67,535.

Frequency of Responses: Reporting: On occasion; Monthly; Annually; Biennially.

Total Burden Hours: 30,583.

Charlene Parker,

Departmental Information Collection Clearance Officer.
