

impact of genetic test results on diary lengths will vary.

*12. What is our policy regarding the disclosure of the results of genetic tests?*

The Privacy Act of 1974 (5 U.S.C. 552a), section 1106 of the Social Security Act (42 U.S.C. 1306), and our disclosure regulations (20 CFR part 401) govern the collection, maintenance, and use of an individual's information in our systems of records. Although these authorities do not specifically address requirements for the disclosure of genetic test results, they apply to the extent we maintain this type of information in our records.

Under the Privacy Act and our disclosure regulations, we generally cannot disclose genetic test results without the consent of the subject of the record. For example, if an individual's MER contains genetic test results and he or she authorizes us to disclose this specific information to a third party, we will do so with a valid, written consent that meets our regulatory requirements.

In addition, the Privacy Act grants individuals a right of access to any records we maintain about them in our systems of records. Therefore, any genetic test results we maintain in an individual's MER (including records a medical consultative examiner may have generated on our behalf) are subject to these access requirements, as is the case with all medical evidence. However, if we determine that direct access to the medical information is likely to have an adverse effect on the subject of the record, we will follow certain procedures in providing access to the information.<sup>46</sup>
