Abstract: Owners and operators of steel plants are required to comply with reporting and record keeping requirements for the general provisions of 40 CFR part 60, subpart A, as well as the applicable standards in 40 CFR part 60, subparts AA and AAa. This includes submitting initial notifications, performance tests and periodic reports and results, and maintaining records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These reports are used by EPA to determine compliance with the standards.

Form Numbers: None.

Respondents/affected entities: Steel plants that produce carbon, alloy, or specialty steels; electric arc furnaces (EAFs), argon oxygen decarburization (AOD) vessels, and dust handling systems.

Respondent's obligation to respond: Mandatory (40 CFR part 60 Subparts AA and AAa).

Estimated number of respondents: 99.6 (total).

Frequency of response: Initially, occasionally and semiannually.

Total estimated burden: 62,000 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$6,430,000 (per year), which includes \$203,000 in both annualized capital/startup and operation & maintenance costs.

Changes in the Estimates: There is an increase in the total estimated burden as currently identified in the OMB Inventory of Approved Burdens. This increase is not due to any program changes. The increases in burden, including number of responses, labor hours, labor costs, and O&M costs reflect an increase in the number of respondents. The new number of respondents accounts for the one new source that is subject to the rule since the last ICR period. Further, this ICR assumes existing respondents will take some time to re-familiarize themselves with the regulatory requirements each year, which results in an increase in the estimated labor hours and costs.

Information Collection Request Submitted to OMB for Review and Approval; Comment Request; NESHAP for Perchloroethylene Dry Cleaning Facilities (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency has submitted an information collection request (ICR), “NESHAP for Perchloroethylene Dry Cleaning Facilities (40 CFR part 63, subpart M) (Renewal)” (EPA ICR No. 1415.11, OMB Control No. 2060–0659), to the Office of Management and Budget (OMB) for

review and approval in accordance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*). This is a proposed extension of the ICR, which is currently approved through April 30, 2016. Public comments were previously requested via the **Federal Register** (80 FR 32116) on June 5, 2015 during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public. An Agency may neither conduct nor sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

DATES: Additional comments may be submitted on or before May 26, 2016.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA–HQ–OECA–2012–0659, to: (1) EPA online using www.regulations.gov (our preferred method), or by email to docket.oeca@epa.gov, or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW., Washington, DC 20460; and (2) OMB via email to oira_submission@omb.eop.gov. Address comments to OMB Desk Officer for EPA.

EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI), or other information whose disclosure is restricted by statute.

Abstract: Owners and operators of perchloroethylene dry cleaning facilities are required to comply with reporting

and record keeping requirements for the general provisions of 40 CFR part 63, subpart A, as well as the applicable standards in 40 CFR part 63, subpart M. This includes submitting initial notifications, performance tests and periodic reports and results, and maintaining records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These reports are used by EPA to determine compliance with these standards.

Form Numbers: None.

Respondents/affected entities: Dry cleaning facilities that use perchloroethylene.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart M).

Estimated number of respondents: 28,012 (total).

Frequency of response: Initially and occasionally.

Total estimated burden: 1,590,000 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$167,000,000 (per year), which includes \$947,000 in both annualized capital/startup and operation & maintenance costs.

Changes in the Estimates: There is an adjustment increase in respondent labor hours in this ICR from the most-recently approved ICR. This is due to assuming all existing sources will have to re-familiarize with the regulatory requirements each year. Additionally, there is an increase in the total capital and O&M cost due to the rounding of all calculated values to three significant digits.

Abstract: This ICR covers the following: The collection of information under 40 CFR part 35, subpart O, which establishes the administrative requirements for cooperative agreements funded under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) for state, federally-recognized Indian tribal governments, and political subdivision response actions; the application of the Hazard Ranking System (HRS) by states as outlined by section 105 of CERCLA (1980 and 1986) that amends the National Oil and Hazardous Substances Pollution Contingency Plan (NCP) to include criteria prioritizing releases throughout the U.S. before undertaking remedial action at uncontrolled hazardous waste sites; and the remedial portion of the Superfund program as specified in the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 as amended (CERCLA) and the National Oil and Hazardous Substances Pollution Contingency Plan (NCP). For Cooperative Agreements and Superfund State Contracts for Superfund Response Actions, the information is collected from applicants and/or recipients of EPA assistance and is used to make awards, pay recipients, and collect information on how federal funds are being utilized. EPA requires this information to meet its federal stewardship responsibilities. Recipient responses are required to obtain a benefit (federal funds) under 40 CFR part 31, "Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments" and under 40 CFR part 35, "State and Local Assistance." For the Superfund Site Evaluation and Hazard Ranking System, the states will apply the HRS by identifying and classifying those releases or sites that warrant further investigation. The HRS score is crucial since it is the primary mechanism used to determine whether a site is eligible to be included on the National Priorities List (NPL). Only sites on the NPL are eligible for Superfund-financed remedial actions. For the NCP information collection, some community involvement activities covered by this ICR are not required at every site (e.g., Technical Assistance Grants) and depend very much on the community and the nature of the site and cleanup. All community activities seek to involve the public in the cleanup of the sites, gain the input of community members, and include the community's perspective on the
