Needs and Uses: The information collection requirement is necessary to execute the voluntary Defense Industrial Base (DIB) Cybersecurity (CS) program. DoD will collect business points of contact (POC) information from all DIB CS program participants on a one-time basis, with updates as necessary, to facilitate communications and the sharing of share unclassified and classified cyber threat information.

Affected Public: Business or other for-profit and not-for-profit institutions.

Annual Burden Hours: 312.

Responses per Respondent: 1.

Annual Responses: 935.

Average Burden per Response: 20 minutes.

Frequency: On occasion.

Respondents are cleared defense contractors participating in DoD's DIB Cybersecurity program who voluntarily share cyber threat information with DoD. DoD estimates that no more than 10% of the total eligible population of cleared defense contractors will apply to the voluntary DIB Cybersecurity program resulting in 850 cleared defense contractors impacted annually. An additional 10% of the population or 85 contractors may provide updated points of contact for the program, as required. Having DIB participants share cyber threat information under the DIB CS program allows both DoD and DIB participants to better understand cyber threats, to better protect unclassified defense information, and increases cyber situational awareness of the overall threat landscape, while preserving the intellectual property and competitive capabilities of our national defense industrial base.
