

Hypothetical People Mover

- This alternative would compare the cost of developing a hypothetical people mover system (on airport) against the cost of bringing the transit line to and through an on-airport station.

If the airport can demonstrate that the costs to be funded through PFC revenues would be less than the cost of building a separate system, then the costs to be funded through PFC revenues would be eligible.

3. Prorate the costs of the trackage on airport property based on ridership forecast. If the airport can demonstrate that the costs to be funded through PFC revenues would be no more than the prorated costs of the trackage on airport property, based on ridership forecasts and the percentage representing passengers and employees utilizing the airport, then those costs could be considered eligible.
