Scoping Meetings

Commission staff will hold two scoping meetings in the vicinity of the project at the time and place noted below. The daytime meeting will focus on resource agency, Indian tribes, and non-governmental organization concerns, while the evening meeting is primarily for receiving input from the public. We invite all interested individuals, organizations, and agencies to attend one or both of the meetings, and to assist staff in identifying particular study needs, as well as the scope of environmental issues to be addressed in the environmental document. The times and locations of these meetings are as follows:

Daytime Scoping Meeting

Date and Time: Thursday, May 12, 2016 at 9:00 a.m.

SUPPLEMENTARY INFORMATION:

Background: The SAB was established pursuant to the Environmental Research, Development, and Demonstration Authorization Act (ERDDAA), codified at 42 U.S.C. 4365, to provide independent scientific and technical advice to the Administrator on the scientific and technical basis for Agency positions and regulations. The SAB is a Federal Advisory Committee chartered under the Federal Advisory Committee Act (FACA), 5 U.S.C., App. 2. The SAB will comply with the provisions of FACA and all appropriate SAB Staff Office procedural policies. Pursuant to FACA and EPA policy, notice is hereby given that the SAB will

hold a public meeting to discuss and deliberate on the topics below.

(1) Quality review of the SAB Draft 4–26–16 Review of EPA's draft Assessment of the Potential Impacts of Hydraulic Fracturing for Oil and Gas on Drinking Water Resources. The EPA's Office of Research and Development (ORD) requested the SAB to conduct a peer review of the draft assessment report concerning the relationship between hydraulic fracturing and drinking water in the United States. The purpose of the report, Assessment of the Potential Impacts of Hydraulic Fracturing for Oil and Gas on Drinking Water Resources (May 2015 External Review Draft, EPA/600/R–15/047), is to synthesize available scientific literature and data to assess the potential for hydraulic fracturing for oil and gas to impact the quality or quantity of drinking water resources, and identify factors affecting the frequency or severity of any potential impacts.

The SAB Hydraulic Fracturing Research Advisory Panel conducted a peer review of the EPA draft assessment and the chartered SAB will conduct a quality review of the panel's draft report. Quality review is a key function of the chartered SAB. Draft reports prepared by SAB committees, panels, or work groups must be reviewed and approved by the chartered SAB before transmittal to the EPA Administrator. Consistent with FACA, the chartered SAB makes a determination in a public meeting about each draft report and determines whether the report is ready to be transmitted to the EPA Administrator.

Background on the current advisory activity, Assessment of the Potential Impacts of Hydraulic Fracturing for Oil and Gas on Drinking Water Resources, can be found on the SAB Web site at <https://yosemite.epa.gov/sab/sabproduct.nsf/LookupWebProjectsCurrentBOARD/F7A9DB9ABBAC015785257E540052DD54?OpenDocument>.

(2) Briefings from representatives of the EPA and other EPA advisory Committees on topics of interest for possible future SAB advice.

If the SAB Staff Office determines that there will be insufficient time during the June 14–15, 2016 meeting to accommodate the members of the public who registered in advance to provide oral public comments, the teleconference will be held on June 8, 2016 to provide additional time for oral public comments.

Availability of Meeting Materials: A meeting agenda and other materials for the meeting will be placed on the SAB Web site at <http://epa.gov/sab>.
