Public Safety and Homeland Security Bureau Seeks Comment on Wireless Carriers' Proposal To Increase Resiliency and Enhance Information Sharing During Disasters

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

1. On April 27, 2016, the carriers filed an ex parte letter detailing a five prong approach to enhance industry coordination to "facilitate greater network resiliency and faster restoration of service" which they assert will "obviate the need for legislative action or inflexible rules that could have unintended consequences." Specifically, the five prongs include: (1) Providing for reasonable roaming under disaster arrangements when technically feasible; (2) fostering mutual aid during emergencies; (3) enhancing municipal preparedness and restoration; (4) increasing consumer readiness and preparation; and (5) improving public awareness and stakeholder communications on service and restoration status. Under each prong, the carriers provide specific actions that they will undertake designed to "enhance coordination among wireless carriers and all key stakeholders, improving information sharing and making wireless network resiliency more robust."

2. In its 2013 Notice of Proposed Rulemaking in this docket (Resiliency Notice), the Commission sought comment on, inter alia, the means to enable greater resiliency and consumer transparency with respect to the performance of wireless communications networks during disasters, including seeking comment on mandatory disclosures or the use of voluntary industry measures. 78 FR 69018, November 18, 2013. In addition, since the Resiliency Notice was issued and the record compiled, the Commission's Public Safety and
