DEPARTMENT OF DEFENSE

Department of the Army

Programmatic Environmental Impact Statement for Training Mission and Mission Support Activities at Fort Campbell, KY

AGENCY: Department of the Army, DoD.

ACTION: Notice of availability.

SUMMARY: The Department of the Army announces the availability of the Final Programmatic Environmental Impact Statement (PEIS) for proposed training mission and mission support activities at Fort Campbell, KY. Pursuant to the National Environmental Policy Act of 1969 (NEPA), the Final PEIS analyzes the potential impacts of training and mission support activities on the environmental resources of Fort Campbell and the surrounding region. The Final PEIS assesses the No Action Alternative, four action alternatives, and a fifth alternative that would implement all of the separate action alternatives. The Proposed Action would meet the Senior Commander's Soldier training requirements, support the Range Complex Master Plan, and streamline the NEPA analysis process for routine range and training land actions occurring at Fort Campbell.

DATES: No decision will be made until at least 30 days after publication of the Notice of Availability in the **Federal Register** by the U.S. Environmental Protection Agency, at which time the Army will document its selection of alternative(s) in a Record of Decision.

ADDRESSES: Please send written comments to Mr. Gene Zirkle, NEPA/Wildlife Program Manager, Environmental Division, Building 2159 13th Street, Fort Campbell, KY 42223; or by email to gene.a.zirkle.civ@mail.mil.

SUPPLEMENTARY INFORMATION: The Final PEIS has been prepared to meet the requirements of NEPA to evaluate the environmental and socioeconomic impacts, as well as cumulative impacts, of implementing the proposed actions at Fort Campbell. The Final PEIS takes into consideration comments received on the Draft PEIS. No substantial changes were made to the Final PEIS based on comments received during the Draft EIS comment period. The Final information includes impacts to, and mitigation for the Northern Long Eared Bat, which was listed as threatened after the Draft EIS was released. The resource areas evaluated include air quality, airspace, biological resources, cultural resources, energy, facilities, land use, hazardous materials/waste, noise, socioeconomic, soils, traffic and transportation, water resources, and wetland resources. There would be no significant impacts; however, moderate
