NUCLEAR REGULATORY COMMISSION

[NRC–2016–0098]

Disposition of Information Related to the Time Period That Safety-Related Structures, Systems, or Components Are Installed

AGENCY: Nuclear Regulatory Commission.

ACTION: Draft regulatory issue summary; request for comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is seeking public comment on a draft regulatory issue summary (RIS) to inform nuclear power reactor licensees of existing requirements related to dispositioning information pertaining to the capability of safety-related structures, systems, and components (SSCs) to perform their safety-related functions in nuclear power plants. The draft RIS addresses instances where a licensee becomes aware of credible information pertaining to the time period that a safety-related structure, system, or component is installed that may negatively impact its ability to perform its safety-related function or functions. Licensees must address this information consistent with their licensing basis and applicable NRC requirements.
