SUPPLEMENTARY INFORMATION:

Supporting documents which explain in detail the information that the EPA will be collecting are available in the public docket for this ICR. The docket can be viewed either online at www.regulations.gov or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW.,

Abstract: The affected entities are subject to the General Provisions of the NSPS at 40 CFR part 60, subpart A, and any changes, or additions to the Provisions specified at 40 CFR part 60, subpart RR. Owners or operators of the affected facilities must submit initial notification, performance tests, and periodic reports and results. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Reports, at a minimum, are required semiannually.

Form Numbers: None.

Respondents/affected entities: Pressure sensitive tape and label surface coating facilities.

Respondent's obligation to respond: Mandatory (40 CFR part 60, subpart RR).

Estimated number of respondents: 42 (total).

Frequency of response: Initially, quarterly and semiannually.

Total estimated burden: 3,970 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$482,000 (per year), includes \$82,600 in both annualized capital/startup and operation & maintenance costs.

Changes in the Estimates: There is an adjustment increase in burden from the previous ICR, including increases in the respondent labor hours, O&M cost, and number of responses. This is due to an increase in the estimated number of sources subject to the standard. In this ICR, we assume the industry continues to grow at a rate of one new source per year. Additionally, there is a small change in the assumption where we assume all existing sources will need to re-familiarize with the regulatory requirements each year. This change in assumption also contributes to the increase in respondent labor hours.

Acting-Director, Collection Strategies Division.

Abstract: The authority for EPA's oil pollution prevention requirements is derived from section 311(j)(1)(C) of the Clean Water Act, as amended by the Oil Pollution Act of 1990. EPA's regulation is codified at 40 CFR part 112. An SPCC Plan will help an owner or operator identify the necessary procedures, equipment, and resources to prevent an oil spill and to respond to an oil spill in a timely manner. If implemented effectively, the SPCC Plan is expected to prevent oil spills and reduce the impact and severity of oil spills. Although the owner or operator is the primary data user, EPA may also require the owner or operator to submit data to the Agency in certain situations to ensure facilities comply with the SPCC regulation and to help allocate response resources. State and local governments may use the data, which are not generally available elsewhere and can assist local emergency preparedness planning efforts. EPA does not require an owner or operator to submit SPCC Plans, but may request the SPCC Plan during a facility inspection or an oil spill incident for review. The SPCC regulation requires the owner or operator maintain a complete copy of the Plan at the facility if the facility is normally attended at least four hours per day or at the nearest field office if the facility is not so attended. The rule also requires that the Plan be available to the Regional Administrator for on-site review during normal working hours (40 CFR 112.3(e)). The supporting statement further explains SPCC Plan Preparation, Certification, and Maintenance, as well as Recordkeeping requirements.

Form Numbers: None.

Respondents/affected entities: Private and state owners or operators of regulated facilities.

Respondent's obligation to respond: Mandatory, pursuant to 40 CFR 112.3(e).
