

services. Including this information in MSIX would help State grantees quickly verify a student's eligibility to receive services under the program.

- *Graduation/HSE Indicator and Graduation/HSE Date:* These two elements would indicate whether a student has graduated from high school or received an HSE diploma, and the date when that event occurred. Grantees use the MSIX system to determine proper enrollment, placement, and credit accrual for migratory students. Including this information in MSIX would help ensure that LOA and local educational agency staff have timely and accurate information about whether and when a migratory student has graduated from high school or received an HSE diploma, thereby allowing much faster determinations about who may continue to receive MEP educational services because they have not graduated or received an HSE diploma, and who may not receive these services because they already have done so.

- *Algebra I Flag:* This element would reflect whether the student has received full credit in Algebra I or an equivalent mathematics course. As reported in National Migrant Education Secondary Credit Accrual Workshops and Focus Groups throughout the years, many States use different course names to reference this mathematics course, and completing the material is essential for both enrollment in higher-level mathematics courses and high school graduation. The Algebra I flag would quickly communicate whether a student has obtained credit for this gatekeeper course, which would enable counselors and other school staff to more quickly enroll and place migratory students in the appropriate mathematics course.
