SUPPLEMENTARY INFORMATION:

Description of Information Collection

Title: Online Registration for FSA-hosted Events and Conferences.

OMB Number: 0560-0226.

Expiration Date of Approval: August 31, 2016.

Type of Request: Extension with a Revision.

Abstract: The collection of information is necessary for people to register online to make payment and reservations to attend conferences and events. They can register on FSA's Online Registration site on the Internet. Respondents who do not have access to the Internet can register by mail or fax. The information is collected by the FSA employees who host the conferences and events. FSA is collecting common elements from interested respondents such as name, organization, address, country, phone number, email address, State, city or town, payment options (credit card, check), special accommodations requests and how the respondent learned of the conference. The information collection element also include race, ethnicity, gender and veteran status. The respondents are mainly individuals who will attend the FSA-hosted conferences or events. The information is used to collect payment, if applicable, from the respondents and make hotel reservations and other special arrangements as necessary. There are no changes to the burden hours since the last OMB approval. FSA is adding new elements in the online registration format to assist individuals and to gather information to provide an appropriate FSA-hosted conference and events. The new elements include: Specifying a request for a type of disability services, identifying how they learned about the event, providing additional names to invite to the event, waiver for liability, and demographic information including gender, race, and ethnicity. The new elements will not increase the burden hours because it is all self-explanatory for the respondent to complete the online format.

The formula used to calculate the total burden hour is estimated average time per responses hours times total responses.

Estimate of Annual Burden: 15 minutes.

Type of Respondents: Individuals.
Estimated Number of Respondents: 900.

Estimated Number of Responses per Respondent: 1.

Estimated Total Annual Number of Responses: 900.

Estimated Average Time per Responses: 0.25.

Estimated Total Annual Burden on Respondents: 225 hours.

We are requesting comments on all aspects of this information collection to help us to:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of FSA, including whether the information will have practical utility;

(2) Evaluate the accuracy of FSA's estimate of burden including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected;

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

All responses to this notice, including name and addresses when provided, will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

National Agricultural Statistics Service

Title: Vegetable Surveys.

OMB Control Number: 0535-0037.

Summary of Collection: The primary function of the National Agricultural Statistics (NASS) is to prepare and issue current official state and national estimates of crop and livestock production, prices and disposition. The Vegetable Surveys Program obtains basic agricultural statistics for fresh market and processing vegetables in major producing States. The vegetable program has two types of utilization: Some crops are processing only, some are fresh market only, and others are dual crops (both processing and fresh market). Vegetable processors are surveyed in August for acreage contracted and estimated yield. In late November, processors are asked for final acreage harvested, production, and value. The fresh market vegetable program consists of specialized growers who are surveyed at the conclusion of the growing season for estimates of crop production. Producers of onions, strawberries, and asparagus are surveyed in August to obtain forecasted acreage and production. NASS will collect information using surveys.

Need and Use of the Information: NASS will collect information to estimate acreage intended to plant, acreage planted, acreage harvested, yield/production, price, and utilization for the various crops. The estimates provide vital statistics for growers, processors, and marketers to use in making production and marketing decisions.

Description of Respondents: Farms; Business or other for-profit.

Number of Respondents: 19,000.

Frequency of Responses: Reporting: Annually; Other (seasonally).

Total Burden Hours: 5,838.
