**SUMMARY:** NMFS announces, in consultation with U.S. Customs and Border Protection (CBP), a test of the International Trade Data System (ITDS) involving the electronic submission of forms and/or data, related to exportation of fish products regulated by NMFS, using the export Partner Government Agency (PGA) data set of the Automated Export System (AES) Trade Interface Requirements, AES Direct via the Automated Commercial Environment (ACE) Secure Web Portal (Portal) and the Document Image System (DIS). CBP and NMFS have developed a plan to test and assess the electronic transmission of export and re-export data for tunas, swordfish and toothfish.

**DATES:** The test will commence after June 1, 2016, and will continue until concluded by publication of a notice in the **Federal Register** ending the test. Participants should consult the following Web site to determine which ports are operational for the test and the date that they become operational: <https://www.cbp.gov/trade/ace/features> (see the PGA Integration tab). Comments

**SUPPLEMENTARY INFORMATION:**

**Background**

**I. The Automated Commercial Environment**

ACE is an automated and electronic system for commercial trade processing, which is intended to streamline business processes, facilitate growth in trade, ensure cargo security, and foster participation in global commerce, while ensuring compliance with U.S. laws and regulations and reducing costs for CBP and all of its communities of interest. The ability to meet these objectives depends on successfully modernizing CBP’s business functions and the information technology that supports those functions.

CBP’s modernization efforts are accomplished through phased releases of ACE component functionality designed to replace a specific function of the legacy Automated Commercial System (ACS) function. Each release will begin with a test and will end with mandatory use of the new ACE feature, thus retiring the legacy ACS function. Each release builds on previous releases and sets the foundation for subsequent releases. AES allows participants to
