SUPPLEMENTARY INFORMATION:

I. Background

DoD, GSA, and NASA are proposing to amend the FAR to delete the use of the terms “telegram”, “telegraph”, “telegraphic”, and related terminology.

The word “telegram” emerged shortly after the invention of the electrical telegraph in the 1840s. This terminology and way of communicating was incorporated into the first issue of the FAR, effective April 1, 1984. The emergence of electronic means of communication, starting with the facsimile machine, and then followed by email and mobile-phone text

messages in the 1990s, resulted in the sparing use of telegraph services and use of telegrams. On this basis, the Councils are proposing to delete telegraphic services from the FAR and replace these terms with an option for electronic communications.

This case is consistent with the Office of Federal Procurement Policy (OFPP) Memorandum dated December 4, 2014 on transforming the marketplace, which describes ongoing actions to support the needs of a 21st century Government.

II. Discussion and Analysis

(1) This rulemaking proposes to delete all references to “telegram” and “telegraph” and replace these terms with an option for electronic communication.

(2) At FAR 49.601–1, a revised policy statement is added to allow the use of electronic means to notify the contractor of a termination for convenience. The objective is to provide an expeditious way to notify the contractor of the termination. This change is necessary because the abbreviated version of the notice of termination for the convenience of the Government is currently linked with the telegraphic notice procedure.

(3) At FAR 49.102, a conforming change is added to allow the use of electronic means to notify the contractor of a termination whether the termination is for convenience or default.

III. Executive Orders 12866 and 13563

Executive Orders (E.O.s) 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). E.O. 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This is not a significant regulatory action and, therefore, was not subject to review under section 6(b) of E.O. 12866, Regulatory Planning and Review, dated September 30, 1993. This proposed rule is not a major rule under 5 U.S.C. 804.

IV. Regulatory Flexibility Act

DoD, GSA, and NASA do not expect this proposed rule to have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.* However, an Initial Regulatory Flexibility Analysis (IRFA) has been prepared consistent

with 5 U.S.C. 603. The analysis is summarized as follows:

The reason for this action is to delete the use of “telegram”, “telegraph”, and related terms. The Councils are proposing to replace these terms with an option for electronic communications. The objective is to delete reference to obsolete technologies no longer in use within the context of the FAR requirements. The proposed rule would apply to all entities, both small and other than small, performing as contractors or subcontractors on U.S. Government contracts. In 2014 there were about 350,000 active registrants in the System for Award Management (SAM). DoD, GSA, and NASA estimate approximately half of the registrants in SAM (175,000) are small entities that will receive a contract or subcontract in a given year. In 2014 small entities received 1,398,605 or about 9 percent of all actions in that year per the Federal Procurement Data System (FPDS). However, the small entities will not be materially affected by this rule, as the only change provided in this rule is recognition of current options for transmitting documents between the Government and contractors. It does not change the policy requiring the Government to notify contractors of a contract termination. The Government is still responsible to obtain evidence of receipt of termination from the contractor.

There are no reporting or recordkeeping requirements associated with this rule.

The rule does not duplicate, overlap, or conflict with any other Federal rules.

There were no significant alternatives identified that would meet the objective of the rule.

The Regulatory Secretariat Division has submitted a copy of the IRFA to the Chief Counsel for Advocacy of the Small Business Administration. A copy of the IRFA may be obtained from the Regulatory Secretariat Division. DoD, GSA, and NASA invite comments from small business concerns and other interested parties on the expected impact of this proposed rule on small entities.

DoD, GSA, and NASA will also consider comments from small entities concerning the existing regulations in subparts affected by the proposed rule in accordance with 5 U.S.C. 610. Interested parties must submit such comments separately and should cite 5 U.S.C. 610 (FAR Case 2015–035), in correspondence.

V. Paperwork Reduction Act

The proposed rule does not contain any information collection requirements that require the approval of the Office of Management and Budget under the Paperwork Reduction Act (44 U.S.C. chapter 35).

SUPPLEMENTARY INFORMATION:**Background**

The New England Fishery Management Council is responsible for developing management measures for skate fisheries in the northeastern U.S. through the Northeast Skate Complex Fishery Management Plan (Skate FMP). Seven skate species are managed under the Skate FMP: Winter; little; thorny; barndoor; smooth; clearnose; and rosette. The Council's Scientific and Statistical Committee reviews the best available information on the status of skate populations and makes recommendations on acceptable biological catch (ABC) for the skate complex (all seven species). This recommendation is then used as the basis for catch limits and other management measures for the skate fisheries.

The regulations implementing the Skate FMP at 50 CFR part 648, subpart O, outline the management procedures and measures for the skate fisheries. Specifications including the annual catch limit (ACL), annual catch target (ACT), total allowable landings (TALs) for the skate wing and bait fisheries, and possession limits may be specified for up to 2 years. The current specifications were implemented as part of Framework Adjustment 2 to the Skate FMP (79 FR 51504, August 29, 2014). The Council is required to develop new specifications for the 2016 and 2017 fishing years. The

existing specifications and possession limits remain in effect until they are replaced. In addition to setting specifications, the Council desired to modify the in-season management of the skate wing fishery, including a new seasonal allocation of the quota in a framework adjustment.

In September 2015, the Council's Scientific and Statistical Committee reviewed updated information on the status of the seven species in the skate complex, including new research on discard mortality rates, and recommended an ABC of 31,081 mt for 2016 and 2017 (a 12-percent reduction from 2015). The recommended catch reduction is based on trawl survey biomass declines in little and clearnose skates, as well as adjustments to historical catch estimates derived from the new discard mortality rate data (lower than previously assumed). According to the most recent stock status information, no skates are experiencing overfishing, and only thorny skate is in an overfished condition. Thorny skate continues to be a prohibited species as part of its long-term stock rebuilding plan. More details are provided in the EA (see **ADDRESSES**).

The Council's Skate Oversight Committee and Advisory Panel (AP) met in October 2015 to develop specification recommendations for Council consideration, following the procedures in Amendment 3 to the Skate FMP (75 FR 34049, June 16, 2010). Following these procedures, the recommended ABC reduction, in addition to increases in the skate discard rate in recent years, resulted in a 23-percent decline in the total allowable landings (TAL) from 2015 levels. Due to the 23-percent reduction in the TAL, the Committee and AP discussed tradeoffs between reducing possession limits versus seasonally allocating the TAL in an effort to avoid in-season closures and maintain a steady supply of skate wings across the year.

Proposed Framework Adjustment Measure

The Council ultimately decided to recommend status quo possession limits (see *Proposed Specification Measures*), but to use a framework adjustment to allocate 57 percent of the skate wing TAL to a Season 1 quota (May 1-August 31). Under this action, the Regional Administrator would be given the authority to reduce the skate wing possession limit from 2,600 lb (1,179 kg) to an incidental catch level of 500 lb (227 kg) when 85 percent of the Season 1 quota is projected to be landed. If 85 percent of the Season 1 quota is projected to be landed between May 1
