**SUPPLEMENTARY INFORMATION:** The Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils, in conjunction with NOAA Fisheries and the Atlantic and Gulf States Marine Fisheries Commissions, have implemented the Southeast Data, Assessment and Review (SEDAR) process, a multi-step method for determining the status of fish stocks in the Southeast Region. SEDAR is a three-step process including: (1) Data Workshop; (2) Assessment Process utilizing webinars; and (3) Review Workshop. The product of the Data Workshop is a data report which compiles and evaluates potential datasets and recommends which datasets are appropriate for assessment analyses. The product of the Assessment Process is a stock assessment report which describes the fisheries, evaluates the status of the stock, estimates biological benchmarks, projects future population conditions, and recommends research and monitoring needs. The assessment is independently peer reviewed at the Review Workshop. The product of the Review Workshop is a Summary documenting panel opinions regarding the strengths and weaknesses of the stock assessment and input data. Participants for SEDAR Workshops are appointed by the Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils and NOAA Fisheries Southeast Regional Office, Highly Migratory Species Management Division, and Southeast Fisheries

Science Center. Participants include: data collectors and database managers; stock assessment scientists, biologists, and researchers; constituency representatives including fishermen, environmentalists, and non-governmental organizations (NGOs); international experts; and staff of Councils, Commissions, and state and federal agencies.

The items of discussion at the Stock ID Work Group post-meeting webinar are as follows:

Participants will finalize recommendations from the Stock ID Work Group meeting as necessary.

#### Summary of Information Collection

DoD uses the following DFARS provisions and clauses in solicitations and contracts to require offerors and contractors to identify and mark data or software requiring protection from unauthorized use, release, or disclosure in accordance with 10 U.S.C. 2320:

252.227–7013, Rights in Technical Data—Noncommercial Items.

252.227–7014, Rights in Noncommercial Computer Software and Noncommercial Computer Software Documentation.

252.227–7017, Identification and Assertion of Use, Release, or Disclosure Restrictions.

252.227–7018, Rights in Noncommercial Technical Data and Computer Software—Small Business Innovation Research (SBIR) Program.

In accordance with 10 U.S.C. 2320(a)(2)(D), DoD may disclose limited rights data to persons outside the Government, or allow those persons to use data with use, release, or disclosure restrictions, if the recipient agrees not to further release, disclose, or use the data. Therefore, the clause at DFARS

252.227–7013, Rights in Technical Data—Noncommercial Items, requires the contractor to identify and mark data or software that it provides with limited rights.

In accordance with 10 U.S.C. 2321(b), contractors and subcontractors at any tier must be prepared to furnish written justification for any asserted restriction on the Government's rights to use or release data. The following DFARS clauses require contractors and subcontractors to maintain adequate records and procedures to justify any asserted restrictions:

252.227–7019, Validation of Asserted Restrictions—Computer Software.

252.227–7037, Validation of Restrictive Markings on Technical Data.

In accordance with 10 U.S.C. 2320, DoD must protect the rights of contractors that have developed items, components, or processes exclusively at private expense. Therefore, the clause at DFARS 252.227–7025, Limitations on the Use or Disclosure of Government-Furnished Information Marked with Restrictive Legends, requires a contractor or subcontractor to submit a use and non-disclosure agreement when it obtains data from the Government to which the Government has less than unlimited rights. In addition, DFARS 227.7103–7, Use and non-disclosure agreement, requires intended recipients of technical data or computer software delivered to the Government with restrictions on use, modification, reproduction, release, performance, display, or disclosure, to sign the use and non-disclosure agreement at 227.7103–7(c) prior to release or disclosure of the data, unless the recipient is a Government contractor that requires access to a third parties data or software for the performance of a Government contract that contains the clause at 252.227–7025, Limitations on Use or Disclosure of Government-Furnished Information Marked with Restrictive Legends. According to 10 U.S.C. 2320(a)(2)(D), DoD may disclose limited rights data to persons outside the Government, or allow those persons to use limited rights data, if the recipient agrees not to further use, release, or disclose the data.

The provision at DFARS 252.227–7028, Technical Data or Computer Software Previously Delivered to the Government, requires an offeror to identify any technical data or computer software that it previously delivered, or will deliver, under any Government contract. DoD needs this information to avoid paying for rights in technical data

or computer software that the Government already owns.
