SUPPLEMENTARY INFORMATION:

Section 404 of the MSA requires the Secretary of Commerce to publish, in the **Federal Register**, a strategic plan for fisheries research for the five years immediately following its previous publication in the **Federal Register**. The MSA requires that the plan address four major areas of research: (1) Research to support fishery conservation and management; (2) conservation engineering research; (3) research on the fisheries; and (4) information management research. The MSA specifies that this plan shall contain a limited number of priority objectives for each of these research areas; indicate goals and timetables; provide a role for commercial fishermen in such research; provide for the collection and dissemination of complete and accurate information concerning fishing activities; and be developed in cooperation with the Regional Fishery

Management Councils and affected states. This draft Report on Fisheries Research is consistent with the requirements of section 404 and with NOAA’s Next Generation Strategic Plan located on the web at http://www.ppi.noaa.gov/wp-content/uploads/NOAA_NGSP.pdf.

NMFS currently conducts a comprehensive program of fisheries research and involves industry and others interested in fisheries planning and implementing its objectives. The scope of the present draft document focuses only on the four major areas of research specified in section 404 of the MSA. It does not include the regulatory and enforcement components of the NMFS mission.
