- I. Background
- II. How does EPA determine whether an area has attained the 2008 ozone standard?
- III. What action is EPA taking and what is the rationale?
- IV. Statutory and Executive Order Reviews

I. Background

On April 30, 2012, the Cleveland, OH and St. Louis, MO-IL areas were designated as nonattainment for the 2008 ozone NAAQS and were classified as marginal, effective July 20, 2012 (77 FR 30088, May 21, 2012). On March 6, 2015 (80 FR 12264), in the final 2008 ozone NAAQS SIP requirements rule, EPA established an attainment deadline for marginal areas of July 20, 2015.

The CAA section 181(b)(2) requires the EPA to determine, based on an area's ozone design value¹ as of the

¹ An area's ozone design value for the 8-hour ozone NAAQS is the highest 3-year average of the annual fourth-highest daily maximum 8-hour average concentrations of all monitors in the area. To determine whether an area has attained the ozone NAAQS prior to the attainment date, EPA considers the monitor-specific ozone design values in the area for the most recent three years with complete, quality-assured, and certified ozone monitoring data prior to the attainment deadline (or for an earlier 3-year period if the area attains the ozone standard ahead of the attainment deadline).
