SUPPLEMENTARY INFORMATION:

Title: Importation of Fruit From Thailand Into the United States.

OMB Control Number: 0579-0308.

Type of Request: Revision to and extension of approval of an information collection.

Abstract: The Plant Protection Act (PPA, 7 U.S.C. 7701 *et seq.*) authorizes the Secretary of Agriculture to restrict the importation, entry, or interstate movement of plants, plant products, and other articles to prevent the introduction of plant pests into the United States or their dissemination within the United States. As authorized by the PPA, APHIS regulates the importation of fruits and vegetables into the United States from certain parts of the world as provided in "Subpart—Fruits and Vegetables" (7 CFR 319.56-1 through 319.56-75).

In accordance with § 319.56-47, litchi, longan, mango, mangosteen, pineapple, and rambutan from Thailand may be imported into the United States under certain conditions to prevent the introduction of plant pests into the United States. These conditions involve the use of information collection activities, including an import permit, production area registration and monitoring, recordkeeping, trust fund agreement, phytosanitary certificate with an additional declaration statement, labeling, compliance agreements, foreign site certificate of inspection and/or treatment, approved irradiation facilities, and facility operational workplans.

We are asking OMB to approve our use of these information collection activities, as described, for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

- (1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

- (2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

- (3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; *e.g.*, permitting electronic submission of responses.

Estimate of Burden: The public reporting burden for this collection of information is estimated to average 0.023 hours per response.

Respondents: Importers of fruit from Thailand and the national plant protection organization of Thailand.

Estimated Annual Number of Respondents: 12.

Estimated Annual Number of Responses per Respondent: 5,594.

Estimated Annual Number of Responses: 67,129.

Estimated Total Annual Burden on Respondents: 1,527 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 27th day of June 2016.

Kevin Shea,

Administrator, Animal and Plant Health Inspection Service.
