

permit it to exercise common control of these entities and CTCR once CTCR acquires the Brady Line.

The exemption will become effective July 28, 2016.

OmniTRAX represents that: (1) The rail line to be acquired and operated by CTCR does not connect with the lines of any of the OmniTRAX Railroads; (2) the continuance in control transaction is not part of a series of anticipated transactions that would result in such a connection; and (3) the proposed transaction does not involve a Class I carrier. Therefore, the transaction is exempt from the prior approval requirements of 49 U.S.C. 11323. See 49 CFR 1180.2(d)(2).

Under 49 U.S.C. 10502(g), the Board may not use its exemption authority to relieve a rail carrier of its statutory obligation to protect the interests of its employees. Section 11326(c), however, does not provide for labor protection for transactions under 11324 and 11325 that involve only Class III rail carriers. Accordingly, the Board may not impose labor protective conditions here, because all of the carriers involved are Class III carriers.

If the verified notice contains false or misleading information, the exemption is void ab initio. Petitions to revoke the exemption under 49 U.S.C. 10502(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the effectiveness of the exemption. Petitions for stay must be filed no later than July 21, 2016 (at least seven days before the exemption becomes effective).

An original and 10 copies of all pleadings, referring to Docket No. FD 36019, must be filed with the Surface Transportation Board, 395 E Street SW., Washington, DC 20423-0001. In addition, one copy of each pleading must be served on William C. Sippel, Fletcher & Sippel LLC, 29 North Wacker Drive, Suite 920, Chicago, IL 60606. Board decisions and notices are available on our Web site at "WWW.STB.DOT.GOV."

Decided: July 11, 2016.

Director, Office of Proceedings.

Clearance Clerk.

DEPARTMENT OF THE TREASURY

Debt Management Advisory Committee Meeting

Notice is hereby given, pursuant to 5 U.S.C. 2, 10(a)(2), that a meeting will be held at the Hay-Adams Hotel, 16th Street and Pennsylvania Avenue NW., Washington, DC on August 2, 2016 at 11:30 a.m. of the following debt management advisory committee: Treasury Borrowing Advisory Committee of the Securities Industry and Financial Markets Association.

The agenda for the meeting provides for a charge by the Secretary of the Treasury or his designate that the Committee discuss particular issues and conduct a working session. Following the working session, the Committee will present a written report of its recommendations. The meeting will be closed to the public, pursuant to 5 U.S.C. 2, 10(d) and Public Law 103-202, 202(c)(1)(B) (31 U.S.C. 3121 note).

This notice shall constitute my determination, pursuant to the authority placed in heads of agencies by 5 U.S.C. 2, 10(d) and vested in me by Treasury Department Order No. 101-05, that the meeting will consist of discussions and debates of the issues presented to the Committee by the Secretary of the Treasury and the making of recommendations of the Committee to the Secretary, pursuant to Public Law 103-202, 202(c)(1)(B). Thus, this information is exempt from disclosure under that provision and 5 U.S.C. 552b(c)(3)(B).

In addition, the meeting is concerned with information that is exempt from disclosure under 5 U.S.C. 552b(c)(9)(A). The public interest requires that such meetings be closed to the public because the Treasury Department requires frank and full advice from representatives of the financial community prior to making its final decisions on major financing operations. Historically, this advice has been offered by debt management advisory committees established by the several major segments of the financial community. When so utilized, such a committee is recognized to be an advisory committee under 5 U.S.C. 2, 3.

Although the Treasury's final announcement of financing plans may not reflect the recommendations provided in reports of the Committee, premature disclosure of the Committee's deliberations and reports would be likely to lead to significant financial speculation in the securities market. Thus, this meeting falls within the exemption covered by 5 U.S.C. 552b(c)(9)(A).

Treasury staff will provide a technical briefing to the press on the day before the Committee meeting, following the release of a statement of economic conditions and financing estimates. This briefing will give the press an opportunity to ask questions about financing projections. The day after the Committee meeting, Treasury will release the minutes of the meeting, any charts that were discussed at the meeting, and the Committee's report to the Secretary.

The Office of Debt Management is responsible for maintaining records of debt management advisory committee meetings and for providing annual reports setting forth a summary of Committee activities and such other matters as may be informative to the public consistent with the policy of 5 U.S.C. 552(b). The Designated Federal Officer or other responsible agency official who may be contacted for additional information is Fred Pietrangeli, Director for Office of Debt Management (202) 622-1876.

Dated: July 7, 2016.

Fred Pietrangeli,

Director, Office of Debt Management.

All Ad-Hoc reports created as part of this system shall be managed per NARA approved GRS 3.2 Items 030, Ad-Hoc reports.

PHYSICAL, PROCEDURAL, AND ADMINISTRATIVE SAFEGUARDS:

1. Data transmissions between VA health care facilities, the HEC, the AITC,

3M Cogent, Inc. databases are accomplished using the Department's secure wide area network. The software programs automatically flag records or events for transmission based upon functional requirements. Server jobs at each facility run continuously to check for data to be transmitted and/or incoming data which needs to be parsed to files on the receiving end. All messages containing data transmissions include header information that is used for validation purposes. The recipients of the messages are controlled and/or assigned to the mail group based on their role or position. Consistency checks in the software are used to validate the transmission and electronic acknowledgment messages are returned to the sending application. VA's Office of Cyber Security has oversight responsibility for planning and implementing computer security.

2. Working spaces and record storage areas at HEC, AITC, and the VHIC processing locations are secured during all business hours, as well as during non-business hours. All entrance doors require an electronic pass card, for entry when unlocked, and entry doors are locked outside normal business hours. Visitors to the HEC are required to present identification, sign-in at a specified location, and are issued a pass card that restricts access to non-sensitive areas. Visitors to the HEC are escorted by staff through restricted areas. At the end of the visit, visitors are required to turn in their badge. The building is equipped with an intrusion alarm system, which is activated during non-business hours. This alarm system is monitored by a private security service vendor. The office space occupied by employees with access to Veteran records is secured with an electronic locking system, which requires a card for entry and exit of that office space. Access to the AITC is generally restricted to AITC staff, VA Central Office employees, custodial personnel, Federal Protective Service and authorized operational personnel through electronic locking devices. All other persons gaining access to the computer rooms are escorted.

3. Access to the VHIC contractor secured work areas is also controlled by electronic entry devices, which require a card and manual input for entry and exit of the production space. The VHIC contractor's building is also equipped with an intrusion alarm system and a security service vendor monitors the system.

4. Contract employees are required to sign a Business Associates Agreement as required by the HIPAA Privacy Rule as acknowledgement of mandatory

provisions regarding the use and disclosure of protected health information. Employee and contractor access is deactivated when no longer required for official duties or upon termination of employment. Recurring monitors are in place to ensure compliance with nationally and locally established security measures.

5. Beneficiary's enrollment and eligibility information is transmitted from the Enrollment and Eligibility information system to VA health care facilities over the Department's secure computerized electronic communications system.

6. Only specific key staff have authorized access to the computer room. Programmer access to the information systems is restricted only to staff whose official duties require that level of access.

7. On-line data reside on magnetic media in the HEC and AITC computer rooms that are highly secured. Backup media are stored in the computer room within the same building and only information system staff and designated management staff have access to the computer room. On a weekly basis, backup media are stored in off-site storage by a media storage vendor. The vendor picks up and returns the media in a locked storage container; vendor personnel do not have key access to the locked container. The AITC has established a backup plan for the Enrollment system as part of a required Certification and Accreditation of the information system.

8. Any sensitive information that may be downloaded to personal computers or printed to hard copy format is provided the same level of security as the electronic records. All paper documents and informal notations containing sensitive data are shredded prior to disposal. All magnetic media (primary computer system) and personal computer disks are degaussed prior to disposal or release off-site for repair. The VHIC contractor destroys all Veteran identification data 30 days after the VHIC card has been mailed to the Veteran in accordance with contractual requirements.

9. All new HEC employees receive initial information security and privacy training; refresher training is provided to all employees on an annual basis. The HEC's Information Security Officer performs an annual information security audit and periodic reviews to ensure security of the system. This annual audit includes the primary computer information system, the telecommunication system, and local area networks. Additionally, the Internal Revenue Service performs

periodic on-site inspections to ensure the appropriate level of security is maintained for Federal tax data.

10. Identification codes and codes used to access Enrollment and Eligibility information systems and records systems, as well as security profiles and possible security violations, are maintained on magnetic media in a secure environment at the Center. For contingency purposes, database backups on removable magnetic media are stored off-site by a licensed and bonded media storage vendor.

11. Contractors, subcontractors, and other users of the Enrollment and Eligibility Records systems will adhere to the same safeguards and security requirements to which HEC staff must comply.

ACCESS:

1. In accordance with national and locally established data security procedures, access to enrollment information databases (HEC Legacy system and the Enrollment Database) is controlled by unique entry codes (access and verification codes). The user's verification code is automatically set to be changed every 90 days. User access to data is controlled by role-based access as determined necessary by supervisory and information security staff as well as by management of option menus available to the employee. Determination of such access is based upon the role or position of the employee and functionality necessary to perform the employee's assigned duties.

2. On an annual basis, employees are required to sign a computer access agreement acknowledging their understanding of confidentiality requirements. In addition, all employees receive annual privacy awareness and information security training. Access to electronic records is deactivated when no longer required for official duties. Recurring monitors are in place to ensure compliance with nationally and locally established security measures.

3. User access to the VHIC database utilizes the national NT network authentication infrastructure. The external VHIC vendor utilizes the One-VA Virtual Private Network secured connection for access to VHIC records.

4. Strict control measures are enforced to ensure that access to and disclosure from all records is limited to VA and the contractor's employees whose official duties warrant access to those files.

5. As required by the provisions of the Health Insurance Portability and Accountability Act (HIPAA) Privacy Rule, 45 CFR parts 160 and 164, access to records by HEC employees is

classified under functional category "Eligibility and Enrollment Staff."
