DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID FEMA-2016-0002; Internal Agency Docket No. FEMA-B-1642]

Proposed Flood Hazard Determinations

AGENCY: Federal Emergency Management Agency, DHS. **ACTION:** Notice.

SUMMARY: Comments are requested on proposed flood hazard determinations, which may include additions or modifications of any Base Flood Elevation (BFE), base flood depth, Special Flood Hazard Area (SFHA) boundary or zone designation, or regulatory floodway on the Flood Insurance Rate Maps (FIRMs), and where applicable, in the supporting Flood Insurance Study (FIS) reports for the communities listed in the table below. The purpose of this notice is to seek general information and comment

regarding the preliminary FIRM, and where applicable, the FIS report that the Federal Emergency Management Agency (FEMA) has provided to the affected communities. The FIRM and FIS report are the basis of the floodplain management measures that the community is required either to adopt or to show evidence of having in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP). In addition, the FIRM and FIS report, once effective, will be used by insurance agents and others to calculate appropriate flood insurance premium rates for new

buildings and the contents of those buildings.

DATES: Comments are to be submitted on or before November 8, 2016.

ADDRESSES: The Preliminary FIRM, and where applicable, the FIS report for each community are available for inspection at both the online location and the respective Community Map Repository address listed in the tables below. Additionally, the current effective FIRM and FIS report for each community are accessible online through the FEMA Map Service Center at *www.msc.fema.gov* for comparison.

You may submit comments, identified by Docket No. FEMA–B–1642, to Rick Sacbibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 400 C Street SW., Washington, DC 20472, (202) 646–7659, or (email) patrick.sacbibit@fema.dhs.gov.

FOR FURTHER INFORMATION CONTACT: Rick Sacbibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 400 C Street SW., Washington, DC 20472, (202) 646–7659, or (email) *patrick.sacbibit@fema.dhs.gov;* or visit the FEMA Map Information eXchange (FMIX) online at *www.floodmaps.fema.gov/fhm/fmx_main.html.*

SUPPLEMENTARY INFORMATION: FEMA

proposes to make flood hazard determinations for each community listed below, in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR 67.4(a).

These proposed flood hazard determinations, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own or pursuant to policies established by other Federal, State, or regional entities. These flood hazard determinations are used to meet the floodplain management requirements of the NFIP and also are used to calculate the appropriate flood insurance premium rates for new buildings built after the FIRM and FIS report become effective.

The communities affected by the flood hazard determinations are provided in the tables below. Any request for reconsideration of the revised flood hazard information shown on the Preliminary FIRM and FIS report that satisfies the data requirements outlined in 44 CFR 67.6(b) is considered an appeal. Comments unrelated to the flood hazard determinations also will be considered before the FIRM and FIS report become effective.

Use of a Scientific Resolution Panel (SRP) is available to communities in support of the appeal resolution process. SRPs are independent panels of experts in hydrology, hydraulics, and other pertinent sciences established to review conflicting scientific and technical data and provide recommendations for resolution. Use of the SRP only may be exercised after FEMA and local communities have been engaged in a collaborative consultation process for at least 60 days without a mutually acceptable resolution of an appeal. Additional information regarding the SRP process can be found online at *http://floodsrp.org/pdfs/srp_ fact sheet.pdf.*

The watersheds and/or communities affected are listed in the tables below. The Preliminary FIRM, and where applicable, FIS report for each community are available for inspection at both the online location and the respective Community Map Repository address listed in the tables. For communities with multiple ongoing Preliminary studies, the studies can be identified by the unique project number and Preliminary FIRM date listed in the tables. Additionally, the current effective FIRM and FIS report for each community are accessible online through the FEMA Map Service Center at www.msc.fema.gov for comparison.

(Catalog of Federal Domestic Assistance No. 97.022, "Flood Insurance.")

Dated: August 2, 2016.

Roy E. Wright,

Deputy Associate Administrator for Insurance and Mitigation, Department of Homeland Security, Federal Emergency Management Agency.

DEPARTMENT OF THE INTERIOR

Geological Survey

[G15AC00486]

Agency Information Collection Activities: Request for Comments on the Assessment of Effects of Climate on Waterfowl

AGENCY: U.S. Geological Survey (USGS), Interior.

ACTION: Notice of a new information collection, Assessment of Effects of Climate on Waterfowl.

SUMMARY: We (the U.S. Geological Survey) are notifying the public that we have submitted to the Office of Management and Budget (OMB) the information collection request (ICR) described below. To comply with the Paperwork Reduction Act of 1995 (PRA) and as part of our continuing efforts to reduce paperwork and respondent burden, we invite the general public and other Federal agencies to take this opportunity to comment on this ICR.

DATES: To ensure that your comments on this ICR are considered, OMB must receive them on or before September 9, 2016.

ADDRESSES: Please submit written comments on this information collection directly to the Office of Management and Budget (OMB), Office of Information and Regulatory Affairs, Attention: Desk Officer for the Department of the Interior, via email: (*OIRA_SUBMISSION@omb.eop.gov*); or by fax (202) 395–5806; and identify your submission with 'OMB Control Number 1028—NEW ASSESSMENT OF EFFECTS OF CLIMATE ON WATERFOWL'. Please also forward a copy of your comments and suggestions on this information collection to the Information Collection Clearance Officer, U.S. Geological Survey, 12201 Sunrise Valley Drive MS 807, Reston, VA 20192 (mail); (703) 648–7195 (fax); or gs-info_collections@usgs.gov (email). Please reference 'OMB Information Collection 1028—NEW: ASSESSMENT OF EFFECTS OF CLIMATE ON WATERFOWL' in all correspondence.

FOR FURTHER INFORMATION CONTACT: Brad Griffith, Leader, USGS, Alaska Cooperative Fish and Wildlife Research Unit at (907) 474–5067 or ffdbg@usgs.gov.

SUPPLEMENTARY INFORMATION:

I. Abstract

The USGS National Climate Change and Wildlife Science Center coordinates the research activities of 8 Regional Climate Science Centers. To increase efficiency of investigations, the relevance of research topics and the effectiveness of research it is critical to identify the types of information that are most critical for the development of a focused and integrated multi-regional research program. This is particularly true for wildlife species that migrate (e.g., waterfowl) among regions in which the direction and strength of climate effects on wildlife populations and their habitats are expected to be quite variable. This collection seeks to identify (1) the most important habitat and harvest factors that affect waterfowl population size on breeding, migratory and winter ranges, (2) the demographic traits (fecundity or survival) that are affected by these factors, (3) the likely direction and magnitude of climate

effects on the most important waterfowl habitat and harvest factors that affect waterfowl population size and (4) the highest priority research needs on breeding, migratory and wintering ranges. We are collecting this information with a questionnaire survey of a sample of professional waterfowl researchers and managers because scientific papers that present this information are not available. The information we collect will identify the most important research topics within and among Regional Climate Science Centers in regard to climate effects on migratory waterfowl. We will (1) summarize the results, (2) present them at a workshop at a national scientific meeting, (3) use this presentation to facilitate further discussion among professional waterfowl researchers and managers who attend the workshop regarding research priorities and (4) publish the results of the survey and the workshop discussion in a refereed scientific publication.

II. Data

OMB Control Number: 1028–NEW. *Title:* ASSESSMENT OF EFFECTS OF

CLIMATE ON WATERFOWL. *Type of Request:* Approval of new

information collection.

Respondent Obligation: Voluntary. Frequency of Collection: One time. Description of Respondents:

Professional waterfowl researchers and managers that are employed by State or Federal government agencies or Private organizations such as Ducks Unlimited.

Estimated Total Number of Annual Responses: 250; Private 125, State and Local Govt. 125.

Estimated Time per Response: We estimate that it will take 20 minutes per person to complete the questionnaire for a single waterfowl species and that approximately half of the respondents
