

with the range of ways that women with opioid use disorder may access substance use treatment or maternity care. The guide will provide options for clinical interventions that recognize the complexities of patients' lives. The guide will also include discussion of any conflicting evidence and clinician, treatment or patient characteristics that directly influence the appropriateness or effectiveness of a given clinical intervention. The paucity of the evidence to support specific interventions will be addressed in the guide. As such, the guide will present options based on current clinical practice, paired with the risks and benefits of each option as currently understood.

Public comment is sought in two general areas: The outcomes of the RAM process and the strategy to translate these findings into a clinical guide. Relevant public comment will inform the development and final appearance of the guide. Members of the expert panel, FSC, and a variety of professional societies will be asked to provide input into the guide outline and drafting of the guide which will then be subject to a formal federal clearance process including scientific review.

Supporting and Related Material in the Docket: The report contains the materials to help inform public comment. The appendices include listings of participants, more detailed information about the literature search, citations of primary references and data tables that were used by SAMHSA to develop the findings in the report. The information provided includes:

- (1) The REPORT
- (2) Supporting appendices: Appendix A: RAM Process Participants; Appendix B: Literature Review Methods; Appendix C: RAM Reference List and Appendices D–E7: Rated Indications

Substance Abuse and Mental Health Services Administration

Agency Information Collection Activities: Proposed Collection; Comment Request

In compliance with Section 3506(c)(2)(A) of the Paperwork

Reduction Act of 1995 concerning opportunity for public comment on proposed collections of information, the Substance Abuse and Mental Health Services Administration (SAMHSA) will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the information collection plans, call the SAMHSA Reports Clearance Officer at 240–276–1243.

Comments are invited on: (a) Whether the proposed collections of information are necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Proposed Project: SAMHSA Disaster Technical Assistance Center Disaster Behavioral Health Needs Assessment and Customer Satisfaction Surveys (OMB No. 0930–0325)—Revision

The Substance Abuse and Mental Health Services Administration (SAMHSA) is requesting approval for a revision to the data collection associated with the SAMHSA Disaster Technical Assistance Center (DTAC) Disaster Behavioral Health Needs Assessment and Customer Satisfaction Surveys (OMB No. 0930–0325), which expire on May 31, 2017. Specifically, SAMHSA DTAC plans to consolidate the Needs Assessment Survey and Customer Satisfaction Surveys into a single instrument. The new revised instrument, entitled SAMHSA DTAC Customer Feedback Survey (CFS), under this effort will also include a change in administration to make it appropriate for a single, streamlined survey.

The proposed data collection effort will provide feedback on the overall effectiveness of SAMHSA DTAC's services, ongoing needs at the national level, and areas that require enhanced technical assistance (TA) services.

SAMHSA DTAC will be responsible for administering the data collection instrument and analyzing the data. SAMHSA DTAC will use data from the instrument to inform current and future TA activities and to ensure these

activities continue to align with state and local needs.

A three-year clearance is being requested. The SAMHSA DTAC CFS is designed to allow the agency to collect feedback on the overall effectiveness of the services provided by SAMHSA DTAC, as well as ongoing data regarding disaster behavioral health (mental health and substance use-related) needs at the national level and areas that require enhanced training and technical assistance (TA) services. This is the information that was previously collected as part of the SAMHSA DTAC Needs Assessment Survey (NAS) and Customer Satisfaction Survey (CSS). Data from this effort will continue to be used to improve services to jurisdictions, which will lead to (1) better integration of disaster behavioral health (DBH) needs with all-hazards disaster preparedness and response, and (2) improved outcomes at the state, territory, tribal, and local levels with less burden on participants. The new Customer Feedback Survey integrates and consolidates questions from the previously utilized NAS and CSS, which will reduce burden associated with the number of instruments and survey questions. SAMHSA DTAC will continue to be responsible for survey administration and analysis of the data collected, which SAMHSA will use to inform current and future training and TA activities. Table 1 shows the estimated burden associated with CFS data collection activities and the associated costs. It is anticipated that the survey will be administered once each year.

Participation in the Customer Feedback Survey will be solicited from all 50 states, the U.S. territories, and the District of Columbia. The survey will be administered to individuals who have requested TA within the six months prior to administration and those who are subscribed to DTAC's e-communications, *SAMHSA DTAC Bulletin*, or *The Dialogue*, at the time of administration. Internet-based technology will be used to collect data via web-based survey for data entry and management.

TABLE 1—ANNUALIZED ESTIMATE OF RESPONDENT BURDEN

Type of respondent	Instrument	Number of respondents	Number of responses	Total number of responses	Hours per response	Total burden hours
TA requestor, e-communications recipient, colleague of previous requestor.	DTAC Customer Feedback Survey.	200	1	200	0.5	100

Send comments to Summer King, SAMHSA Reports Clearance Officer, 5600 Fishers Lane, 15E57-B, Rockville, MD 20857 OR email a copy to summer.king@samhsa.hhs.gov. Written comments should be received by October 11, 2016.

Summer King,
Statistician.

BILLING CODE 4162-20-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Substance Abuse and Mental Health Services Administration

Agency Information Collection Activities: Submission for OMB Review; Comment Request

Periodically, the Substance Abuse and Mental Health Services Administration (SAMHSA) will publish a summary of information collection requests under OMB review, in compliance with the Paperwork Reduction Act (44 U.S.C. chapter 35). To request a copy of these documents, call the SAMHSA Reports Clearance Officer on (240) 276-1243.

Project: Interviews With Grantees Integrating Behavioral Health Treatment, Prevention, and HIV Medical Care Services (OMB NO. 0930-0336)—Reinstatement

SAMHSA is requesting Office of Management and Budget (OMB) approval to conduct in-person Site Visit Interviews with Minority AIDS Initiative—Continuum of Care (MAI-CoC) Grantees Integrating Behavioral Health Treatment, Prevention, and HIV

Medical Care Services. This reinstatement request utilizes revised versions of the site visit interview guide approved under the Minority AIDS Initiative—Targeted Capacity Expansion (MAI-TCE) Grantees Integrating HIV Primary Care, Substance Abuse, and Behavioral Health Services (OMB NO. 0930-0336). The two rounds of interviews (baseline and follow-up) target the collection of programmatic-level data (e.g., community context, organizational structure, and staffing and staff development, services and service model, outreach, referral and enrollment into services, services/care coordination and integration and funding for integrated services and program successes and challenges) through one-on-one and group interviews with grantees who are part of the MAI-CoC program.

The goal of the MAI-CoC project is to integrate behavioral health treatment, prevention, and HIV and Hepatitis medical care services for racial/ethnic minority populations at high risk for behavioral health disorders who are also at high risk for or living with HIV and Hepatitis. The program also supports other priority populations including men who have sex with men (MSM) and bisexual men, transgender persons, and people with substance use disorder. The program is primarily intended for substance use disorder treatment and community mental health providers to provide coordinated and integrated services through the collocation and/or integration of behavioral health treatment and HIV and Hepatitis medical care. Interviews conducted with MAI-CoC grantees during the two rounds of site visits are an integral part of evaluation efforts to: (1) Assess the

impact of the SAMHSA-funded HIV and Hepatitis programs in: Reducing behavioral health disorders and HIV and Hepatitis infections; increasing access to substance use disorder and mental disorder treatment and care; improving behavioral and mental health outcomes; and reducing HIV and Hepatitis-related disparities; (2) Describe the different integrated behavioral health and medical program models; and (3) Determine which program types or models are most effective in improving behavioral health and clinical outcomes.

Over the four-year project, SAMHSA will conduct two rounds of these in-person site visits (baseline and follow-up) with each of the 34 MAI-CoC program grantees.

SAMHSA will conduct one-on-one and group interviews with MAI-CoC grantee staff who will provide information on their program's integration of HIV and Hepatitis prevention, medical care, and primary care into behavioral health services. While participating in the evaluation is a condition of the grantees' funding, participating in the interview process is voluntary. The instruments are designed to collect information about: (1) The development and changes in MAI-CoC program operations, staffing, training and programming; (2) the grantee organization, the MAI-CoC program and its structure, the community context surrounding program efforts, and changes that result from MAI-CoC activities; and, (3) the changes in the number or nature of partnerships and collaborations both internal and external to the MAI-CoC program grantee.

Below is the table of the estimated total burden hours:

Data collection tool	Number of respondents	Number of responses per respondent	Total number responses	Hour per response	Total burden hours
Initial Site Visit Interview Guide	306	1	306	2	612
Follow-up Site Visit Interview Guide	306	1	306	1	306
Total	306	612	918

Written comments and recommendations concerning the proposed information collection should

be sent by September 12, 2016 to the SAMHSA Desk Officer at the Office of Information and Regulatory Affairs,

Office of Management and Budget (OMB). To ensure timely receipt of comments, and to avoid potential delays
