

- Are subject to more intensive screening of their baggage or person; and
- Experience different volume conditions and wait times as they proceed through the security checkpoints.

Each survey includes 10 to 15 questions pulled from a list of 82 questions previously approved by OMB. Each question promotes a quality response so that TSA can identify areas in need of improvement. All questions concern aspects of the passenger's security screening experience, such as:

- Confidence in Personnel.
- Confidence in Screening Equipment.
- Confidence in Security Procedures.
- Convenience of Divesting.
- Experience at Checkpoint.
- Satisfaction with Wait Time.
- Separation from Belongings.
- Separation from Others in Party.
- Stress Level.

TSA personnel use random procedures to select passengers to voluntarily participate in the survey until TSA obtains the desired sample size. The samples may be selected with one randomly selected time and location or span multiple times and locations. All responses are voluntary and there is no burden on passengers who choose not to respond.

TSA intends to collect this information in order to continue to assess customer satisfaction in an effort to more efficiently manage its security screening performance at airports. TSA can use this detailed, airport-specific data to enhance customer experiences and its performance at specific airports.

Number of Respondents: 9,600.

Estimated Annual Burden Hours: An estimated 800 hours annually.

Dated: August 19, 2016.

Christina A. Walsh,

TSA Paperwork Reduction Act Officer, Office of Information Technology.
