

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 1

[WT Docket No. 15–180; DA 16–900]

First Amendment to Collocation Agreement

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: In this document, the Wireless Telecommunications Bureau (WTB or Bureau) of the Federal Communications Commission (FCC or Commission) announces that on August 3, 2016, the FCC, the Advisory Council on Historic Preservation (Council or ACHP), and the National Conference of State Historic Preservation Officers (NCSHPO) executed the attached *First Amendment to Nationwide Programmatic Agreement for the Collocation of Wireless Antennas* (First Amendment to the Collocation Agreement) to address the review of deployments of small wireless antennas and associated equipment under Section 106 of the National Historic Preservation Act (NHPA). The First Amendment to the Collocation Agreement amends the *Nationwide Programmatic Agreement for the Collocation of Wireless Antennas* (Collocation Agreement).

DATES: This amendment to 47 CFR part 1, appendix B, of the FCC's rules is effective August 29, 2016, except for Stipulation VII.C, which contains information collection requirements that have not been approved by the Office of Management and Budget (OMB). The Commission will publish a document in the **Federal Register** announcing the effective date of that Stipulation. The First Amendment to the Collocation Agreement took effect on August 3, 2016, upon execution by the parties.

FOR FURTHER INFORMATION CONTACT: Stephen DelSordo, of the Spectrum and Competition Policy Division, Wireless Telecommunications Bureau, (202) 418–1986 or Stephen.delsordo@fcc.gov or Paul D'Ari of the Spectrum and Competition Policy Division, Wireless Telecommunications Bureau, (202) 418–1550, Paul.DAri@fcc.gov.

SUPPLEMENTARY INFORMATION: This is a summary of the document in WT Docket No. 15–180, DA No. 16–900, released as a Public Notice by WTB on August 8, 2016 (document or *Public Notice*), to announce execution of the First Amendment to the Collocation Agreement. The full text of this document is available for inspection

and copying during business hours in the FCC Reference Information Center, Portals II, 445 12th Street SW., Room CY–A257, Washington, DC 20554. Also, it may be purchased from the Commission's duplicating contractor at Portals II, 445 12th Street SW., Room CY–B402, Washington, DC 20554; the contractor's Web site, <http://www.bcpiweb.com>; or by calling (800) 378–3160, facsimile (202) 488–5563, or email FCC@BCPIWEB.com. This Public Notice will also be available via www.fcc.gov/ecfs. Documents will be available electronically in ASCII, Microsoft Word, and/or Adobe Acrobat.

I. Background

1. The document announced that the FCC, ACHP, and NCHPO had executed the First Amendment to the Nationwide Programmatic Agreement for the Collocation of Wireless Antennas. The FCC, the Council, and NCSHPO agreed to amend the Collocation Agreement, which is codified at 47 CFR, part 1, appendix B, to account for the limited potential of small wireless antennas and associated equipment, including Distributed Antenna Systems (DAS) and small cell facilities, to affect historic properties.

2. The amendment establishes new exclusions from the Section 106 review process for physically small deployments like DAS and small cells, fulfilling a directive in the Infrastructure Report and Order, 80 FR 1238, Jan. 8, 2015, (Infrastructure Report and Order) to further streamline review of these installations. These new exclusions will reduce the cost, time, and burden associated with deploying small facilities in many settings, and provide opportunities to increase densification at low cost and with very little impact on historic properties. Facilitating these deployments thus directly advances efforts to roll out 5G service in communities across the country.

3. To fulfill its responsibilities under Section 106 of the National Historic Preservation Act (NHPA) (54 U.S.C. 306108 (formerly codified at 16 U.S.C. 470(f)), the Commission incorporated the requirements of Section 106 of the NHPA, into its environmental rules. Section 1.1307(a)(4), 47 CFR 1.1307(a)(4), of the Commission's rules directs licensees and applicants to follow the procedures set forth in the ACHP's rules, as modified by two programmatic agreements executed by the Commission with ACHP and NCSHPO, in order to determine whether certain undertakings will affect historic properties. The Collocation Agreement, 47 CFR part 1, app. B, addresses historic preservation review for collocations on

existing towers, buildings, and other non-tower structures. Under the Collocation Agreement, most antenna collocations on existing structures are excluded from Section 106 historic preservation review, with a few exceptions defined to address potentially problematic situations. The other programmatic agreement, the *Nationwide Programmatic Agreement for Review of Effects on Historic Properties for Certain Undertakings Approved by the Federal Communications Commission* (NPA), 47 CFR part 1, app. C, establishes detailed procedures for the Section 106 review process as applied to the construction of communications facilities regulated by the Commission, consistent with the goal of the NHPA to protect historic properties.

4. In the Infrastructure Report and Order, the Commission recognized that small deployments like DAS and small cells use components that are a fraction of the size of traditional cell tower deployments and can often be installed on utility poles, buildings, and other existing structures with limited or no potential to cause adverse effects on historic properties. Accordingly, the Commission eliminated some routine Section 106 reviews by adopting two targeted exclusions for certain small-facility collocations on utility structures and on buildings and other non-tower structures, provided that they meet certain specified criteria. The Commission also stated that there is room for additional improvement in this area, determined that any more comprehensive measures would require additional consideration, and found that such measures would be more appropriately addressed and developed through the program alternative process. The Commission committed to work with ACHP and other interested parties to develop a program alternative to promote additional appropriate efficiencies in the historic preservation review of DAS and small-cell deployments.

5. The Bureau formally commenced this proceeding on July 28, 2015, by releasing a Public Notice and Section 106 Scoping Document (Section 106 Scoping Document) inviting comment on a proposal to amend the Collocation Agreement to facilitate the review process for deployments of small wireless communications facilities under Section 106 of the NHPA. After considering the comments filed in response to the Section 106 Scoping Document and additional information provided in meetings with State Historic Preservation Officers (SHPOs), Tribal historic preservation officers (THPOs),

Tribal Nations, industry representatives and other interested parties, the Bureau worked with ACHP and NCSHPO to develop a specific proposal. It released and sought public comment on this proposed amendment to the Collocation Agreement by Public Notice released on May 12, 2016, 81 FR 39611, June 17, 2016. Comments filed in response to the Public Notice, as well as the Scoping Document Public Notice and the Section 106 Scoping Document may be found in the Commission's Electronic Comment Filing System.

II. Discussion

6. Following their review of the comments filed in response to the Public Notice released on May 12, 2016, as well as other information provided by interested parties, the Bureau, ACHP, and NCSHPO finalized and executed this amendment to the Collocation Agreement. As summarized below, the amendment tailors the Section 106 process for small wireless deployments by excluding deployments that have minimal potential for adverse effects on historic properties.

7. *Exclusion For Collocation of Small Wireless Antennas and Associated Equipment on Buildings and Non-Tower Structures That Are Outside of Historic Districts And Are Not Historic Properties.* The original Collocation Agreement provides an exclusion for collocations that are outside of historic districts on buildings and non-tower structures that are not more than 45 years of age. The amendment adds new Stipulation VI, which establishes an exclusion for collocations on buildings or non-tower structures that are over 45 years of age if they are not historic properties and are outside of historic districts. In particular, this new exclusion, provides that a small wireless antenna may be mounted on an existing building or non-tower structure, regardless of the building's or structure's age, without review under the Section 106 process set forth in the NPA unless: (1) The building or structure is inside the boundary of a historic district or, if the antenna is visible from the ground level of a historic district, the building or structure is within 250 feet of the boundary of the historic district; (2) the building or non-tower structure is a designated National Historic Landmark; or (3) the building or non-tower structure is listed in or eligible for listing in the National Register of Historic Places. In addition, this exclusion establishes volumetric limits for antennas and its associated equipment, as well as restrictions on ground disturbance.

8. *Exclusion for Collocation of Small or Minimally Visible Wireless Antennas and Associated Equipment on Structures in Historic Districts or on Historic Properties.* Stipulation VII.A provides an exclusion from review for a collocation mounted on a building or non-tower structure that is a historic property or inside or within 250 feet of the boundary of a historic district, subject to visibility limits, and provided that the property on which the equipment will be deployed is not a designated National Historic Landmark. Under this exclusion, the antenna or antenna enclosure must be the only equipment that is visible from the ground level, and the antenna or enclosure must not exceed 3 cubic feet in volume, and must be installed using concealment techniques that match or complement the structure on which or within which it is deployed. No other antenna on the building or non-tower structure may be visible from the ground level. In addition, the amendment includes provisions restricting the visibility of an antenna's associated equipment. The amendment also includes limits on the extent of ground disturbance associated with the collocation, and on the number and size of lightning grounding rods that may be installed.

9. Stipulation VII.B generally provides an exclusion for a small wireless deployment on a utility pole or electric transmission tower located inside or near a historic district, provided that the utility pole or electric transmission tower is in active use by a utility company and the deployment does not exceed specific volume limits. The amendment also contains restrictions on the extent of ground disturbance associated with the deployment.

10. Stipulation VII.C provides an exclusion in certain cases for collocations on traffic lights, light poles, lamp posts, or other structures whose primary purpose is to provide public lighting where the structures are located inside or near a historic district. This exclusion is generally available only on a case-by-case basis, on the condition that the applicant or licensee finds that the structure is not a contributing or compatible element within the historic district and the SHPO concurs with this determination. The collocation also must meet specified volumetric and comply with restrictions on ground disturbance.

11. *Replacements of Small Wireless Antennas and Associated Equipment.* Stipulation VIII generally excludes replacements from routine Section 106 review when the support structure is (1) a historic property, (2) inside or near a

historic district, or (3) over 45 years of age. The replacement is excluded from review, regardless of visibility, provided that (1) the antenna deployment being replaced has undergone Section 106 review (unless such review was not required at the time that the antenna being replaced was installed); (2) the facility is an in-kind replacement for an existing facility, and (3) the new deployment does not exceed specified size limits.

12. *Collocations in the Interior of a Building.* The amendment also excludes from historic preservation review collocations in the interior of a building. Stipulation V.B provides that an antenna and its associated equipment installed in the interior of a building is generally excluded from review, regardless of the building's age or its location in a historic district and regardless of the antenna's size, provided that the building is not a National Historic Landmark, or listed in or eligible for listing in the National Register. A collocation in the interior of a building that is listed in or eligible for listing in the National Register is excluded from routine historic preservation review, but it is subject to strict visibility limits, the property in which the equipment will be deployed may not be a designated National Historic Landmark, and it may not be located in or near a historic district.

13. *Installations in or on Historic Buildings or Structures.* Stipulations VI, and VII provide that the antennas and associated equipment deployed on buildings and other structures or in the interior of buildings must be installed in ways that do not damage historic materials and permit removal of such facilities without damaging historic materials.

14. *Pending Complaints.* A proposed collocation is not eligible for an exclusion under this agreement if the licensee or the owner of the building or non-tower structure has received written or electronic notification that the FCC is in receipt of a complaint from a member of the public, a Tribal Nation, a SHPO or the Council, that the collocation has an adverse effect on one or more historic properties.

15. Finally, the amended agreement affects only the FCC's review process under Section 106 of the NHPA, and will not limit State and local governments' authority to enforce their own historic preservation requirements consistent with Section 332(c)(7) of the Communications Act and Section 6409(a) of the Middle Class Tax Relief and Job Creation Act of 2012. In addition, the terms of this amendment to the Collocation Agreement do not

apply on “tribal lands” as defined under Section 800.16(x) of the Council’s regulations, 36 CFR 800.16(x), and the terms do not preclude federally recognized Tribal Nations or Native Hawaiian Organizations (NHOs) from consulting directly with the FCC or its licensees.

III. Procedural Matters

16. *Final Paperwork Reduction Act Analysis*. Stipulation VII.C of the First Amendment to the Collocation Agreement contains new or modified information collection requirements subject to the Paperwork Reduction Act of 1995 (PRA), Public Law 104–13. Stipulation VII.C will be submitted to the Office of Management and Budget (OMB) for review under Section 3507(d) of the PRA. OMB, the general public, and other Federal agencies are invited to comment on the new or modified information collection requirements contained in this proceeding. In addition, pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, see 44 U.S.C. 3506(c)(4), the Commission seeks specific comment on how the Commission might further reduce the information collection burden for small business concerns with fewer than 25 employees.

17. *Congressional Review Act*. Congressional Review Act. The Commission will not send a copy of the First Amendment to the Collocation Agreement, appended for reference as 47 CFR part 1, app. B, to Congress and the General Accountability Office pursuant to the Congressional Review Act (CRA) because the First Amendment is not a rule as defined in the CRA, see 5 U.S.C. 804(3).

List of Subjects in 47 CFR Part 1

Administrative practice and procedures, Telecommunications.

Federal Communications Commission.

Sue McNeil,

Chief of Staff, Wireless Telecommunications Bureau.

Final Rules

For the reasons discussed in the preamble, the Federal Communications Commission amends 47 CFR part 1 as follows:

PART 1—PRACTICE AND PROCEDURE

■ 1. The authority citation for part 1 continues to read:

Authority: 47 U.S.C. 151, 154(i), 155, 157, 225, 303(r), 309, 1403, 1404, 1451, and 1452.

■ 2. Appendix B to part 1 is revised to read as follows:

Appendix B to Part 1—Nationwide Programmatic Agreement for the Collocation of Wireless Antennas

First Amendment to NATIONWIDE PROGRAMMATIC AGREEMENT

For the COLLOCATION OF WIRELESS ANTENNAS

Executed by The FEDERAL COMMUNICATIONS COMMISSION, The NATIONAL CONFERENCE OF STATE HISTORIC PRESERVATION OFFICERS and The ADVISORY COUNCIL ON HISTORIC PRESERVATION

WHEREAS, the Federal Communications Commission (FCC), the Advisory Council on Historic Preservation (the Council) and the National Conference of State Historic Preservation Officers (NCSHPO) executed this Nationwide Collocation Programmatic Agreement on March 16, 2001 in accordance with 36 CFR Section 800.14(b) to address the Section 106 review process as it applies to the collocation of antennas; and,

WHEREAS, the FCC encourages collocation of antennas where technically and economically feasible, in order to reduce the need for new tower construction; and in its Wireless Infrastructure Report and Order, WT Docket No. 13–238, et al, released October 21, 2014, adopted initial measures to update and tailor the manner in which it evaluates the impact of proposed deployments on the environment and historic properties and committed to expeditiously conclude a program alternative to implement additional improvements in the Section 106 review process for small deployments that, because of their characteristics, are likely to have minimal and not adverse effects on historic properties; and,

WHEREAS, the Middle Class Tax Relief and Job Creation Act of 2012 (Title VI — Public Safety Communications and Electromagnetic Spectrum Auctions, Middle Class Tax Relief and Job Creation Act of 2012, Pub. L. 112–96, 126 Stat. 156 (2012)) was adopted with the goal of advancing wireless broadband services, and the amended provisions in this Agreement further that goal; and,

WHEREAS, advances in wireless technologies since 2001 have produced systems that use smaller antennas and compact radio equipment, including those used in Distributed Antenna Systems (DAS) and small cell systems, which are a fraction of the size of traditional cell tower deployments and can be installed on utility poles, buildings, and other existing structures as collocations; and,

WHEREAS, the parties to this Collocation Agreement have taken into account new technologies involving use of small antennas that may often be collocated on utility poles, buildings, and other existing structures and increase the likelihood that such collocations will have minimal and not adverse effects on historic properties, and rapid deployment of such infrastructure may help meet the surging demand for wireless services, expand broadband access, support innovation and

wireless opportunity, and enhance public safety—all to the benefit of consumers and the communities in which they live; and,

WHEREAS, the FCC, the Council, and NCSHPO have agreed that these new measures should be incorporated into this Collocation Agreement to better manage the Section 106 consultation process and streamline reviews for collocation of antennas; and,

WHEREAS, the FCC, the Council, and NCSHPO have crafted these new measures with the goal of promoting technological neutrality, with the goal of obviating the need for further amendments in the future as technologies evolve; and,

WHEREAS, notwithstanding the intent to draft provisions in a manner that obviates the need for future amendments, in light of the public benefits associated with rapid deployment of the facilities required to provide broadband wireless services, the FCC, the Council, and NCSHPO have agreed that changes in technology and other factors relating to the placement and operation of wireless antennas and associated equipment may necessitate further amendments to this Collocation Agreement in the future; and,

WHEREAS, the FCC, the Council, and NCSHPO have agreed that with respect to the amendments involving the use of small antennas, such amendments affect only the FCC’s review process under Section 106 of the NHPA, and will not limit State and local governments’ authority to enforce their own historic preservation requirements consistent with Section 332(c)(7) of the Communications Act and Section 6409(a) of the Middle Class Tax Relief and Job Creation Act of 2012; and,

WHEREAS, the FCC, the Council, and NCSHPO acknowledge that federally recognized Indian tribes (Indian tribes), Native Hawaiian Organizations (NHOs), SHPO/THPOs, local governments, and members of the public make important contributions to the Section 106 review process, in accordance with Section 800.2(c) & (d) of the Council’s rules, and note that the procedures for appropriate public notification and participation in connection with the Section 106 process are set forth the Nationwide Programmatic Agreement Regarding the Section 106 National Historic Preservation Act Review Process (NPA); and,

WHEREAS, the parties hereto agree that the amended procedures described in this amendment to the Collocation Agreement are, with regard to collocations as defined herein, a proper substitute for the FCC’s compliance with the Council’s rules, in accordance and consistent with Section 106 of the National Historic Preservation Act and its implementing regulations found at 36 CFR part 800; and,

WHEREAS, the FCC sought comment from Indian tribes and Native Hawaiian Organizations regarding the terms of this amendment to the Collocation Agreement by letters dated April 17, 2015, July 28, 2015, and May 12, 2016, as well as during face-to-face meetings and conference calls, including during the Section 106 Summit in conjunction with the 2015 annual conference of the National Association of Tribal Historic Preservation Officers (NATHPO); and,

WHEREAS, the terms of this amendment to the Collocation Agreement do not apply on “tribal lands” as defined under Section 800.16(x) of the Council’s regulations, 36 CFR 800.16(x) (“Tribal lands means all lands within the exterior boundaries of any Indian reservation and all dependent Indian communities.”); and,

WHEREAS, the terms of this amendment to the Collocation Agreement do not preclude Indian tribes or NHOs from consulting directly with the FCC or its licensees, tower companies and applicants for antenna licenses when collocation activities off tribal lands may affect historic properties of religious and cultural significance to Indian tribes or NHOs; and,

WHEREAS, the execution and implementation of this amendment to the Collocation Agreement will not preclude members of the public from filing complaints with the FCC or the Council regarding adverse effects on historic properties from any existing tower or any activity covered under the terms of this Collocation Agreement;

NOW THEREFORE, in accordance with Stipulation XI (as renumbered by this amendment), the FCC, the Council, and NCSHPO agree to amend the Collocation Agreement to read as follows:

NATIONWIDE PROGRAMMATIC AGREEMENT

For the COLLOCATION OF WIRELESS ANTENNAS

Executed by The FEDERAL COMMUNICATIONS COMMISSION, The NATIONAL CONFERENCE OF STATE HISTORIC PRESERVATION OFFICERS and The ADVISORY COUNCIL ON HISTORIC PRESERVATION

WHEREAS, the Federal Communications Commission (FCC) establishes rules and procedures for the licensing of wireless communications facilities in the United States and its Possessions and Territories; and,

WHEREAS, the FCC has largely deregulated the review of applications for the construction of individual wireless communications facilities and, under this framework, applicants are required to prepare an Environmental Assessment (EA) in cases where the applicant determines that the proposed facility falls within one of certain environmental categories described in the FCC’s rules (47 CFR 1.1307), including situations which may affect historical sites listed or eligible for listing in the National Register of Historic Places (“National Register”); and,

WHEREAS, Section 106 of the National Historic Preservation Act (54 U.S.C. 300101 et seq.) (“the Act”) requires federal agencies to take into account the effects of their undertakings on historic properties and to afford the Advisory Council on Historic Preservation (Council) a reasonable opportunity to comment; and,

WHEREAS, Section 800.14(b) of the Council’s regulations, “Protection of Historic Properties” (36 CFR 800.14(b)), allows for programmatic agreements to streamline and tailor the Section 106 review process to particular federal programs; and,

WHEREAS, in August 2000, the Council established a Telecommunications Working Group to provide a forum for the FCC, Industry representatives, State Historic Preservation Officers (SHPOs) and Tribal Historic Preservation Officers (THPOs), and the Council to discuss improved coordination of Section 106 compliance regarding wireless communications projects affecting historic properties; and,

WHEREAS, the FCC, the Council and the Working Group have developed this Collocation Programmatic Agreement in accordance with 36 CFR Section 800.14(b) to address the Section 106 review process as it applies to the collocation of antennas (collocation being defined in Stipulation I.B below); and,

WHEREAS, the FCC encourages collocation of antennas where technically and economically feasible, in order to reduce the need for new tower construction; and,

WHEREAS, the parties hereto agree that the effects on historic properties of collocations of antennas on towers, buildings and structures are likely to be minimal and not adverse, and that in the cases where an adverse effect might occur, the procedures provided and referred to herein are proper and sufficient, consistent with Section 106, to assure that the FCC will take such effects into account; and,

WHEREAS, the execution of this Nationwide Collocation Programmatic Agreement will streamline the Section 106 review of collocation proposals and thereby reduce the need for the construction of new towers, thereby reducing potential effects on historic properties that would otherwise result from the construction of those unnecessary new towers; and,

WHEREAS, the FCC and the Council have agreed that these measures should be incorporated into a Nationwide Programmatic Agreement to better manage the Section 106 consultation process and streamline reviews for collocation of antennas; and,

WHEREAS, since collocations reduce both the need for new tower construction and the potential for adverse effects on historic properties, the parties hereto agree that the terms of this Agreement should be interpreted and implemented wherever possible in ways that encourage collocation; and,

WHEREAS, the parties hereto agree that the procedures described in this Agreement are, with regard to collocations as defined herein, a proper substitute for the FCC’s compliance with the Council’s rules, in accordance and consistent with Section 106 of the National Historic Preservation Act and its implementing regulations found at 36 CFR part 800; and,

WHEREAS, the FCC has consulted with the National Conference of State Historic Preservation Officers (NCSHPO) and requested the President of NCSHPO to sign this Nationwide Collocation Programmatic Agreement in accordance with 36 CFR Section 800.14(b)(2)(iii); and,

WHEREAS, the FCC sought comment from Indian tribes and Native Hawaiian Organizations (NHOs) regarding the terms of this Nationwide Programmatic Agreement by

letters of January 11, 2001 and February 8, 2001; and,

WHEREAS, the terms of this Programmatic Agreement do not apply on “tribal lands” as defined under Section 800.16(x) of the Council’s regulations, 36 CFR 800.16(x) (“Tribal lands means all lands within the exterior boundaries of any Indian reservation and all dependent Indian communities.”); and,

WHEREAS, the terms of this Programmatic Agreement do not preclude Indian tribes or Native Hawaiian Organizations from consulting directly with the FCC or its licensees, tower companies and applicants for antenna licenses when collocation activities off tribal lands may affect historic properties of religious and cultural significance to Indian tribes or Native Hawaiian organizations; and,

WHEREAS, the execution and implementation of this Nationwide Collocation Programmatic Agreement will not preclude Indian tribes or NHOs, SHPO/THPOs, local governments, or members of the public from filing complaints with the FCC or the Council regarding adverse effects on historic properties from any existing tower or any activity covered under the terms of this Programmatic Agreement.

NOW THEREFORE, the FCC, the Council, and NCSHPO agree that the FCC will meet its Section 106 compliance responsibilities for the collocation of antennas as follows.

STIPULATIONS

The FCC, in coordination with licensees, tower companies, applicants for antenna licenses, and others deemed appropriate by the FCC, will ensure that the following measures are carried out.

I. DEFINITIONS

For purposes of this Nationwide Programmatic Agreement, the following definitions apply.

A. “Antenna” means an apparatus designed for the purpose of emitting radio frequency (“RF”) radiation, to be operated or operating from a fixed location pursuant to FCC authorization, for the transmission of writing, signs, signals, data, images, pictures, and sounds of all kinds, including the transmitting device and any on-site equipment, switches, wiring, cabling, power sources, shelters or cabinets associated with that antenna and added to a Tower, structure, or building as part of the original installation of the antenna. For purposes of this Agreement, the term Antenna does not include unintentional radiators, mobile stations, or devices authorized under Part 15 of the FCC’s rules.

B. “Collocation” means the mounting or installation of an antenna on an existing tower, building or structure for the purpose of transmitting and/or receiving radio frequency signals for communications purposes, whether or not there is an existing antenna on the structure.

C. “NPA” is the Nationwide Programmatic Agreement Regarding the Section 106 National Historic Preservation Act Review Process (47 CFR part 1, App. C).

D. “Tower” is any structure built for the sole or primary purpose of supporting FCC-

licensed antennas and their associated facilities.

E. "Substantial increase in the size of the tower" means:

1) The mounting of the proposed antenna on the tower would increase the existing height of the tower by more than 10%, or by the height of one additional antenna array with separation from the nearest existing antenna not to exceed twenty feet, whichever is greater, except that the mounting of the proposed antenna may exceed the size limits set forth in this paragraph if necessary to avoid interference with existing antennas; or

2) The mounting of the proposed antenna would involve the installation of more than the standard number of new equipment cabinets for the technology involved, not to exceed four, or more than one new equipment shelter; or

3) The mounting of the proposed antenna would involve adding an appurtenance to the body of the tower that would protrude from the edge of the tower more than twenty feet, or more than the width of the tower structure at the level of the appurtenance, whichever is greater, except that the mounting of the proposed antenna may exceed the size limits set forth in this paragraph if necessary to shelter the antenna from inclement weather or to connect the antenna to the tower via cable; or

4) The mounting of the proposed antenna would involve excavation outside the current tower site, defined as the current boundaries of the leased or owned property surrounding the tower and any access or utility easements currently related to the site.

II. APPLICABILITY

A. This Nationwide Collocation Programmatic Agreement applies only to the collocation of antennas as defined in Stipulations I.A and I.B. above.

B. This Nationwide Collocation Programmatic Agreement does not cover any Section 106 responsibilities that federal agencies other than the FCC may have with regard to the collocation of antennas.

III. COLLOCATION OF ANTENNAS ON TOWERS CONSTRUCTED ON OR BEFORE MARCH 16, 2001

A. An antenna may be mounted on an existing tower constructed on or before March 16, 2001 without such collocation being reviewed through the Section 106 process set forth in the NPA, unless:

1. The mounting of the antenna will result in a substantial increase in the size of the tower as defined in Stipulation I.E, above; or,

2. The tower has been determined by the FCC to have an adverse effect on one or more historic properties, where such effect has not been avoided or mitigated through a conditional no adverse effect determination, a Memorandum of Agreement, a programmatic agreement, or a finding of compliance with Section 106 and the NPA; or,

3. The tower is the subject of a pending environmental review or related proceeding before the FCC involving compliance with Section 106 of the National Historic Preservation Act; or,

4. The collocation licensee or the owner of the tower has received written or electronic

notification that the FCC is in receipt of a complaint from a member of the public, an Indian Tribe, a SHPO or the Council, that the collocation has an adverse effect on one or more historic properties. Any such complaint must be in writing and supported by substantial evidence describing how the effect from the collocation is adverse to the attributes that qualify any affected historic property for eligibility or potential eligibility for the National Register.

IV. COLLOCATION OF ANTENNAS ON TOWERS CONSTRUCTED AFTER MARCH 16, 2001

A. An antenna may be mounted on an existing tower constructed after March 16, 2001 without such collocation being reviewed through the Section 106 process set forth in the NPA, unless:

1. The Section 106 review process for the existing tower set forth in 36 CFR part 800 (including any applicable program alternative approved by the Council pursuant to 36 CFR 800.14) and any associated environmental reviews required by the FCC have not been completed; or,

2. The mounting of the new antenna will result in a substantial increase in the size of the tower as defined in Stipulation I.E, above; or,

3. The tower as built or proposed has been determined by the FCC to have an adverse effect on one or more historic properties, where such effect has not been avoided or mitigated through a conditional no adverse effect determination, a Memorandum of Agreement, a Programmatic Agreement, or otherwise in compliance with Section 106 and the NPA; or,

4. The collocation licensee or the owner of the tower has received written or electronic notification that the FCC is in receipt of a complaint from a member of the public, an Indian Tribe, a SHPO or the Council, that the collocation has an adverse effect on one or more historic properties. Any such complaint must be in writing and supported by substantial evidence describing how the effect from the collocation is adverse to the attributes that qualify any affected historic property for eligibility or potential eligibility for the National Register.

V. COLLOCATION OF ANTENNAS ON BUILDINGS AND NON-TOWER STRUCTURES

A. An antenna may be mounted on a building or non-tower structure without such collocation being reviewed through the Section 106 process set forth in the NPA, unless:

1. The building or structure is over 45 years old, and the collocation does not meet the criteria established in Stipulation VI herein for collocations of small antennas;¹ or,

2. The building or structure is inside the boundary of a historic district, or if the

¹ For purposes of this Agreement, suitable methods for determining the age of a building or structure include, but are not limited to: (1) Obtaining the opinion of a consultant who meets the Secretary of Interior's Professional Qualifications Standards for Historian or for Architectural Historian (36 CFR part 61); or (2) consulting public records.

antenna is visible from the ground level of a historic district, the building or structure is within 250 feet of the boundary of the historic district, and the collocation does not meet the criteria established in Stipulation VII herein for collocations of small or minimally visible antennas; or,

3. The building or non-tower structure is a designated National Historic Landmark, or listed in or eligible for listing in the National Register of Historic Places based upon the review of the FCC, licensee, tower company or applicant for an antenna license, and the collocation does not meet the criteria established in Stipulation VII herein for collocations of small or minimally visible antennas; or,

4. The collocation licensee or the owner of the building or non-tower structure has received written or electronic notification that the FCC is in receipt of a complaint from a member of the public, an Indian Tribe, a SHPO or the Council, that the collocation has an adverse effect on one or more historic properties. Any such complaint must be in writing and supported by substantial evidence describing how the effect from the collocation is adverse to the attributes that qualify any affected historic property for eligibility or potential eligibility for the National Register.

B. An antenna (including associated equipment included in the definition of Antenna in Stipulation I.A.) may be mounted in the interior of a building, regardless of the building's age or location in a historic district and regardless of the antenna's size, without such collocation being reviewed through the Section 106 process set forth in the NPA, unless:

1) The building is a designated National Historic Landmark, or listed in or eligible for listing in the National Register of Historic Places; or,

2) The collocation licensee or the owner of the building has received written or electronic notification that the FCC is in receipt of a complaint from a member of the public, an Indian Tribe, a SHPO or the Council, that the collocation has an adverse effect on one or more historic properties. Any such complaint must be in writing and supported by substantial evidence describing how the effect from the collocation is adverse to the attributes that qualify any affected historic property for eligibility or potential eligibility for the National Register.

C. Subsequent to the collocation of an antenna, should the SHPO/THPO or Council determine that the collocation of the antenna or its associated equipment installed under the terms of Stipulation V has resulted in an adverse effect on historic properties, the SHPO/THPO or Council may notify the FCC accordingly. The FCC shall comply with the requirements of Section 106 and the NPA for this particular collocation.

VI. ADDITIONAL EXCLUSION FOR COLLOCATION OF SMALL WIRELESS ANTENNAS AND ASSOCIATED EQUIPMENT ON BUILDING AND NON-TOWER STRUCTURES THAT ARE OUTSIDE OF HISTORIC DISTRICTS AND ARE NOT HISTORIC PROPERTIES

A. A small wireless antenna (including associated equipment included in the

definition of Antenna in Stipulation I.A.) may be mounted on an existing building or non-tower structure or in the interior of a building regardless of the building's or structure's age without such collocation being reviewed through the Section 106 process set forth in the NPA unless:

1. The building or structure is inside the boundary of a historic district, or if the antenna is visible from the ground level of a historic district, the building or structure is within 250 feet of the boundary of the historic district, and the collocation does not meet the criteria established in Stipulation VII herein for collocations of small or minimally visible antennas; or,

2. The building or non-tower structure is a designated National Historic Landmark; or,

3. The building or non-tower structure is listed in or eligible for listing in the National Register of Historic Places, and the collocation does not meet the criteria established in Stipulation VII herein for collocations of small or minimally visible antennas; or,

4. The collocation licensee or the owner of the building or non-tower structure has received written or electronic notification that the FCC is in receipt of a complaint from a member of the public, an Indian Tribe, a SHPO or the Council, that the collocation has an adverse effect on one or more historic properties. Any such complaint must be in writing and supported by substantial evidence describing how the effect from the collocation is adverse to the attributes that qualify any affected historic property for eligibility or potential eligibility for the National Register; or,

5. The antennas and associated equipment exceed the volume limits specified below:

a. Each individual antenna, excluding the associated equipment (as defined in the definition of Antenna in Stipulation I.A.), that is part of the collocation must fit within an enclosure (or if the antenna is exposed, within an imaginary enclosure, *i.e.*, one that would be the correct size to contain the equipment) that is individually no more than three cubic feet in volume, and all antennas on the structure, including any pre-existing antennas on the structure, must in aggregate fit within enclosures (or if the antennas are exposed, within imaginary enclosures, *i.e.*, ones that would be the correct size to contain the equipment) that total no more than six cubic feet in volume; and,

b. All other wireless equipment associated with the structure, including pre-existing enclosures and including equipment on the ground associated with antennas on the structure, but excluding cable runs for the connection of power and other services, may not cumulatively exceed:

i. 28 cubic feet for collocations on all non-pole structures (including but not limited to buildings and water tanks) that can support fewer than 3 providers; or,

ii. 21 cubic feet for collocations on all pole structures (including but not limited to light poles, traffic signal poles, and utility poles) that can support fewer than 3 providers; or,

iii. 35 cubic feet for non-pole collocations that can support at least 3 providers; or,

iv. 28 cubic feet for pole collocations that can support at least 3 providers; or,

6. The depth and width of any proposed ground disturbance associated with the collocation exceeds the depth and width of any previous ground disturbance (including footings and other anchoring mechanisms). Up to four lightning grounding rods of no more than three-quarters of an inch in diameter may be installed per project regardless of the extent of previous ground disturbance.

B. The volume of any deployed equipment that is not visible from public spaces at the ground level from 250 feet or less may be omitted from the calculation of volumetric limits cited in this Section.

C. Subsequent to the collocation of an antenna, should the SHPO/THPO or Council determine that the collocation of the antenna or its associated equipment installed under the terms of Stipulation VI has resulted in an adverse effect on historic properties, the SHPO/THPO or Council may notify the FCC accordingly. The FCC shall comply with the requirements of Section 106 and the NPA for this particular collocation.

VII. ADDITIONAL EXCLUSIONS FOR COLLOCATION OF SMALL OR MINIMALLY VISIBLE WIRELESS ANTENNAS AND ASSOCIATED EQUIPMENT IN HISTORIC DISTRICTS OR ON HISTORIC PROPERTIES

A. A small antenna (including associated equipment included in the definition of Antenna in Stipulation I.A.) may be mounted on a building or non-tower structure or in the interior of a building that is (1) a historic property (including a property listed in or eligible for listing in the National Register of Historic Places) or (2) inside or within 250 feet of the boundary of a historic district without being reviewed through the Section 106 process set forth in the NPA, provided that:

1. The property on which the equipment will be deployed is not a designated National Historic Landmark.

2. The antenna or antenna enclosure (including any existing antenna), excluding associated equipment, is the only equipment that is visible from the ground level, or from public spaces within the building (if the antenna is mounted in the interior of a building), and provided that the following conditions are met:

a. No other antennas on the building or non-tower structure are visible from the ground level, or from public spaces within the building (for an antenna mounted in the interior of a building);

b. The antenna that is part of the collocation fits within an enclosure (or if the antenna is exposed, within an imaginary enclosure *i.e.*, one that would be the correct size to contain the equipment) that is no more than three cubic feet in volume; and,

c. The antenna is installed using stealth techniques that match or complement the structure on which or within which it is deployed;

3. The antenna's associated equipment is not visible from:

a. The ground level anywhere in a historic district (if the antenna is located inside or within 250 feet of the boundary of a historic district); or,

b. Immediately adjacent streets or public spaces at ground level (if the antenna is on a historic property that is not in a historic district); or,

c. Public spaces within the building (if the antenna is mounted in the interior of a building).

4. The facilities (including antenna(s) and associated equipment identified in the definition of Antenna in Stipulation I.A.) are installed in a way that does not damage historic materials and permits removal of such facilities without damaging historic materials;

5. The depth and width of any proposed ground disturbance associated with the collocation does not exceed the depth and width of any previous ground disturbance (including footings and other anchoring mechanisms). Up to four lightning grounding rods of no more than three-quarters of an inch in diameter may be installed per project, regardless of the extent of previous ground disturbance; and

6. The collocation licensee or the owner of the building or non-tower structure has not received written or electronic notification that the FCC is in receipt of a complaint from a member of the public, an Indian Tribe, a SHPO or the Council, that the collocation has an adverse effect on one or more historic properties. Any such complaint must be in writing and supported by substantial evidence describing how the effect from the collocation is adverse to the attributes that qualify any affected historic property for eligibility or potential eligibility for the National Register.

B. A small antenna (including associated equipment included in the definition of Antenna in Stipulation I.A.) may be mounted on a utility pole or electric transmission tower (but not including light poles, lamp posts, and other structures whose primary purpose is to provide public lighting) that is in active use by a utility company (as defined in Section 224 of the Communications Act) or by a cooperatively-owned, municipal, or other governmental agency and is either: (1) A historic property (including a property listed in or eligible for listing in the National Register of Historic Places); (2) located on a historic property (including a property listed in or eligible for listing in the National Register of Historic Places); or (3) located inside or within 250 feet of the boundary of a historic district, without being reviewed through the Section 106 process set forth in the NPA, provided that:

1. The utility pole or electric transmission tower on which the equipment will be deployed is not located on a designated National Historic Landmark;

2. The antenna, excluding the associated equipment, fits within an enclosure (or if the antenna is exposed, within an imaginary enclosure, *i.e.*, one that would be the correct size to contain the equipment) that is no more than three cubic feet in volume, with a cumulative limit of 6 cubic feet if there is more than one antenna/antenna enclosure on the structure;

3. The wireless equipment associated with the antenna and any pre-existing antennas and associated equipment on the structure, but excluding cable runs for the connection

of power and other services, are cumulatively no more than 21 cubic feet in volume;

4. The depth and width of any proposed ground disturbance associated with the collocation does not exceed the depth and width of any previous ground disturbance (including footings and other anchoring mechanisms). Up to four lightning grounding rods of no more than three-quarters of an inch in diameter may be installed per project, regardless of the extent of previous ground disturbance; and

5. The collocation licensee or the owner of the utility pole or electric transmission tower has not received written or electronic notification that the FCC is in receipt of a complaint from a member of the public, an Indian Tribe, a SHPO or the Council, that the collocation has an adverse effect on one or more historic properties. Any such complaint must be in writing and supported by substantial evidence describing how the effect from the collocation is adverse to the attributes that qualify any affected historic property for eligibility or potential eligibility for the National Register.

C. Proposals to mount a small antenna on a traffic control structure (*i.e.*, traffic light) or on a light pole, lamp post or other structure whose primary purpose is to provide public lighting, where the structure is located inside or within 250 feet of the boundary of a historic district, are generally subject to review through the Section 106 process set forth in the NPA. These proposed collocations will be excluded from such review on a case-by-case basis, if (1) the collocation licensee or the owner of the structure has not received written or electronic notification that the FCC is in receipt of a complaint from a member of the public, an Indian Tribe, a SHPO or the Council, that the collocation has an adverse effect on one or more historic properties; and (2) the structure is not historic (not a designated National Historic Landmark or a property listed in or eligible for listing in the National Register of Historic Places) or considered a contributing or compatible element within the historic district, under the following procedures:

1. The applicant must request in writing that the SHPO concur with the applicant's determination that the structure is not a contributing or compatible element within the historic district.

2. The applicant's written request must specify the traffic control structure, light pole, or lamp post on which the applicant proposes to collocate and explain why the structure is not a contributing element based on the age and type of structure, as well as other relevant factors.

3. The SHPO has thirty days from its receipt of such written notice to inform the applicant whether it disagrees with the applicant's determination that the structure is not a contributing or compatible element within the historic district.

4. If within the thirty-day period, the SHPO informs the applicant that the structure is a contributing element or compatible element within the historic district or that the applicant has not provided sufficient information for a determination, the applicant may not deploy its facilities on that

structure without completing the Section 106 review process.

5. If, within the thirty day period, the SHPO either informs the applicant that the structure is not a contributing or compatible element within the historic district, or the SHPO fails to respond to the applicant within the thirty-day period, the applicant has no further Section 106 review obligations, provided that the collocation meets the following requirements:

a. The antenna, excluding the associated equipment, fits within an enclosure (or if the antenna is exposed, within an imaginary enclosure, *i.e.*, one that would be the correct size to contain the equipment) that is no more than three cubic feet in volume, with a cumulative limit of 6 cubic feet if there is more than one antenna/antenna enclosure on the structure;

b. The wireless equipment associated with the antenna and any pre-existing antennas and associated equipment on the structure, but excluding cable runs for the connection of power and other services, are cumulatively no more than 21 cubic feet in volume; and,

c. The depth and width of any proposed ground disturbance associated with the collocation does not exceed the depth and width of any previous ground disturbance (including footings and other anchoring mechanisms). Up to four lightning grounding rods of no more than three-quarters of an inch in diameter may be installed per project, regardless of the extent of previous ground disturbance.

D. A small antenna mounted inside a building or non-tower structure and subject to the provisions of this Stipulation VII is to be installed in a way that does not damage historic materials and permits removal of such facilities without damaging historic materials.

E. Subsequent to the collocation of an antenna, should the SHPO/THPO or Council determine that the collocation of the antenna or its associated equipment installed under the terms of Stipulation VII has resulted in an adverse effect on historic properties, the SHPO/THPO or Council may notify the FCC accordingly. The FCC shall comply with the requirements of Section 106 and the NPA for this particular collocation.

VIII. REPLACEMENTS ON SMALL WIRELESS ANTENNAS AND ASSOCIATED EQUIPMENT

A. An existing small antenna that is mounted on a building or non-tower structure or in the interior of a building that is (1) a historic property (including a designated National Historic Landmark or a property listed in or eligible for listing in the National Register of Historic Places); (2) inside or within 250 feet of the boundary of a historic district; or (3) located on or inside a building or non-tower structure that is over 45 years of age, regardless of visibility, may be replaced without being reviewed through the Section 106 process set forth in the NPA, provided that:

1. The antenna deployment being replaced has undergone Section 106 review, unless either (a) such review was not required at the time that the antenna being replaced was installed, or (b) for deployments on towers,

review is not required pursuant to Stipulation III above.

2. The facility is a replacement for an existing facility, and it does not exceed the greater of:

a. The size of the existing antenna/antenna enclosure and associated equipment that is being replaced; or,

b. The following limits for the antenna and its associated equipment:

i. The antenna, excluding the associated equipment, fits within an enclosure (or if the antenna is exposed, within an imaginary enclosure, *i.e.*, one that would be the correct size to contain the equipment) that is no more than three cubic feet in volume, with a cumulative limit of 6 cubic feet if there is more than one antenna/antenna enclosure on the structure; and,

ii. The wireless equipment associated with the antenna and any pre-existing antennas and associated equipment on the structure, but excluding cable runs for the connection of power and other services, are cumulatively no more than 21 cubic feet in volume; and,

3. The replacement of the facilities (including antenna(s) and associated equipment as defined in Stipulation I.A.) does not damage historic materials and permits removal of such facilities without damaging historic materials; and,

4. The depth and width of any proposed ground disturbance associated with the collocation does not exceed the depth and width of any previous ground disturbance (including footings and other anchoring mechanisms). Up to four lightning grounding rods of no more than three-quarters of an inch in diameter may be installed per project, regardless of the extent of previous ground disturbance.

B. A small antenna mounted inside a building or non-tower structure and subject to the provisions of this Stipulation VIII is to be installed in a way that does not damage historic materials and permits removal of such facilities without damaging historic materials.

IX. RESERVATION OF RIGHTS

Neither execution of this Agreement, nor implementation of or compliance with any term herein shall operate in any way as a waiver by any party hereto, or by any person or entity complying herewith or affected hereby, of a right to assert in any court of law any claim, argument or defense regarding the validity or interpretation of any provision of the National Historic Preservation Act (54 U.S.C. 300101 *et seq.*) or its implementing regulations contained in 36 CFR part 800.

X. MONITORING

A. FCC licensees shall retain records of the placement of all licensed antennas, including collocations subject to this Nationwide Programmatic Agreement, consistent with FCC rules and procedures.

B. The Council will forward to the FCC and the relevant SHPO any written objections it receives from members of the public regarding a collocation activity or general compliance with the provisions of this Nationwide Programmatic Agreement within thirty (30) days following receipt of the written objection. The FCC will forward a

copy of the written objection to the appropriate licensee or tower owner.

C. Any member of the public may notify the FCC of concerns it has regarding the application of this Programmatic Agreement within a State or with regard to the review of individual undertakings covered or excluded under the terms of this Agreement. Comments shall be directed to the FCC's Federal Preservation Officer. The FCC will consider public comments and, following consultation with the SHPO, potentially affected Tribes, or the Council, as appropriate, take appropriate actions. The FCC shall notify the objector of the outcome of its actions.

XI. AMENDMENTS

If any signatory to this Nationwide Collocation Programmatic Agreement believes that this Agreement should be amended, that signatory may at any time propose amendments, whereupon the signatories will consult to consider the amendments. This agreement may be amended only upon the written concurrence of the signatories.

XII. TERMINATION

A. If the FCC determines, or if NCSHPO determines on behalf of its members, that it or they cannot implement the terms of this Nationwide Collocation Programmatic Agreement, or if the FCC, NCSHPO or the Council determines that the Programmatic Agreement is not being properly implemented or that the spirit of Section 106 is not being met by the parties to this Programmatic Agreement, the FCC, NCSHPO or the Council may propose to the other signatories that the Programmatic Agreement be terminated.

B. The party proposing to terminate the Programmatic Agreement shall notify the other signatories in writing, explaining the reasons for the proposed termination and the particulars of the asserted improper implementation. Such party also shall afford the other signatories a reasonable period of time of no less than thirty (30) days to consult and remedy the problems resulting in improper implementation. Upon receipt of such notice, the parties shall consult with each other and notify and consult with other entities that either are involved in such implementation or would be substantially affected by termination of this Agreement, and seek alternatives to termination. Should the consultation fail to produce within the original remedy period or any extension a reasonable alternative to termination, a resolution of the stated problems, or convincing evidence of substantial implementation of this Agreement in accordance with its terms, this Programmatic Agreement shall be terminated thirty days after notice of termination is served on all parties and published in the **Federal Register**.

C. In the event that the Programmatic Agreement is terminated, the FCC shall advise its licensees and tower owner and management companies of the termination and of the need to comply with any applicable Section 106 requirements on a case-by-case basis for collocation activities.

XIII. ANNUAL MEETING OF THE SIGNATORIES

The signatories to this Nationwide Collocation Programmatic Agreement will meet annually on or about the anniversary of the effective date of the NPA to discuss the effectiveness of this Agreement and the NPA, including any issues related to improper implementation, and to discuss any potential amendments that would improve the effectiveness of this Agreement.

XIV. DURATION OF THE PROGRAMMATIC AGREEMENT

This Programmatic Agreement for collocation shall remain in force unless the Programmatic Agreement is terminated or superseded by a comprehensive Programmatic Agreement for wireless communications antennas.

Execution of this Nationwide Programmatic Agreement by the FCC, NCSHPO and the Council, and implementation of its terms, constitutes evidence that the FCC has afforded the Council an opportunity to comment on the collocation as described herein of antennas covered under the FCC's rules, and that the FCC has taken into account the effects of these collocations on historic properties in accordance with Section 106 of the National Historic Preservation Act and its implementing regulations, 36 CFR part 800. [Docket No. 150121066-5717-02]

RIN 0648-XE820

Atlantic Highly Migratory Species; Atlantic Bluefin Tuna Fisheries

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; inseason General category retention limit adjustment.

SUMMARY: NMFS is adjusting the Atlantic bluefin tuna (BFT) General

category daily retention limit from the default limit of one large medium or giant BFT to five large medium or giant BFT for the September, October through November, and December subquota time periods of the 2016 fishing year. This action is based on consideration of the regulatory determination criteria regarding inseason adjustments, and applies to Atlantic Tunas General category (commercial) permitted vessels and Highly Migratory Species (HMS) Charter/Headboat category permitted vessels when fishing commercially for BFT.

DATES: Effective September 1, 2016, through December 31, 2016.

FOR FURTHER INFORMATION CONTACT: Sarah McLaughlin or Brad McHale, 978-281-9260.

SUPPLEMENTARY INFORMATION: Regulations implemented under the authority of the Atlantic Tunas Convention Act (ATCA; 16 U.S.C. 971 *et seq.*) and the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act; 16 U.S.C. 1801 *et seq.*) governing the harvest of BFT by persons and vessels subject to U.S. jurisdiction are found at 50 CFR part 635. Section 635.27 subdivides the U.S. BFT quota recommended by the International Commission for the Conservation of Atlantic Tunas (ICCAT) among the various domestic fishing categories, per the allocations established in the 2006 Atlantic Consolidated Highly Migratory Species Fishery Management Plan (2006 Consolidated HMS FMP) (71 FR 58058, October 2, 2006), as amended by Amendment 7 to the 2006 Consolidated HMS FMP (Amendment 7) (79 FR 71510, December 2, 2014), and in accordance with implementing regulations. NMFS is required under ATCA and the Magnuson-Stevens Act to provide U.S. fishing vessels with a reasonable opportunity to harvest the ICCAT-recommended quota.

The currently codified baseline U.S. quota is 1,058.9 mt (not including the 25 mt ICCAT allocated to the United States to account for bycatch of BFT in pelagic longline fisheries in the Northeast Distant Gear Restricted Area). Among other things, Amendment 7 revised the allocations to all quota categories, effective January 1, 2015. See § 635.27(a). The currently codified General category quota is 466.7 mt. Each of the General category time periods ("January," June through August, September, October through November, and December) is allocated a portion of the annual General category quota. The codified baseline General category subquotas include 123.7 mt for
