Background

On December 4, 2015, President Obama signed into law the FAST Act. The FAST Act authorizes \$305 billion over fiscal years 2016 through 2020 for DOT's highway, highway and motor

vehicle safety, public transportation, motor carrier safety, hazardous materials safety, rail, and research, technology and statistics programs.

Section 1421 of the FAST Act, "Productive and Timely Expenditure of Funds," states that the Secretary shall develop guidance that encourages the use of programmatic approaches to project delivery, expedited and prudent procurement techniques, and other best practices to facilitate productive, effective, and timely expenditure of funds for projects eligible for funding under title 23, United States Code. The Secretary is directed to work with States to ensure that any guidance developed under section 1421(a) is consistently implemented by States and the Federal Highway Administration to avoid unnecessary delays in completing projects; minimize cost overruns; and ensure the effective use of Federal funding.

For the purposes of section 1421, FHWA interprets the term "programmatic approach" to mean a method, procedure, tool, or technique that promotes increased efficiency by taking advantage of economy of scale (e.g., a construction contract that provides for the replacement of bridges at multiple locations in lieu of separate contracts for each bridge). The term "programmatic agreement" means an agreement that sets procedures for consultation, review, and compliance with Federal laws. Programmatic agreements allow repetitive actions to be handled on a program basis rather than on a project-by-project basis (e.g., an agreement between a State department of transportation and an FHWA Division Office concerning the roles and responsibilities associated with review and approval of changes in Interstate-System Access). Programmatic approaches may include programmatic agreements.

The FHWA invites public comment on the following:

- As it relates to section 1421, what procedures, techniques, programmatic approaches, or best practices should be considered for inclusion on the Web site?

- What information resources are readily available that will provide documentation regarding procedures that avoid unnecessary delays, minimize cost overruns, and ensure the effective use of funds?

An example list of resources is available at the following Web site: <http://www.fhwa.dot.gov/construction/contracts/section1421.cfm>. The FHWA will consider posting information regarding the recommended procedures, techniques, programmatic approaches,

and best practices collected through this public notice and comment process.

SUPPLEMENTARY INFORMATION:

I. Background

Under 49 U.S.C. 31136(e) and 31315, FMCSA may grant an exemption from the Federal Motor Carrier Safety Regulations for a 2-year period if it finds “such exemption would likely achieve a level of safety that is equivalent to or greater than the level that would be achieved absent such exemption.” The statute also allows the Agency to renew exemptions at the end of the 2-year period. The 37 individuals listed in this notice have recently requested such an exemption from the diabetes prohibition in 49 CFR 391.41(b) (3), which applies to drivers of CMVs in interstate commerce. Accordingly, the Agency will evaluate the qualifications of each applicant to determine whether granting the exemption will achieve the required level of safety mandated by statute.
