

sustainable recreation uses of the two NCAs, through the development of new, non-motorized trails and visitor amenities. In Alternative D of the Draft RMP for the Red Cliffs NCA, the BLM also proposed the designation of a new utility and transportation corridor to accommodate all of the potential highway alignments that Washington County provided to the BLM for the “northern transportation route”. Also under Alternative D, rights-of-way could be granted for new utilities, water lines, and associated roads within the designated utility and transportation corridor.

### Proposed RMPs and Proposed Amendment and Abbreviated Final EIS

The Proposed RMPs for the Beaver Dam Wash and Red Cliffs NCAs and Proposed Amendment to the St. George Field Office RMP are primarily based on the management goals, objectives, and actions identified in the draft plans as the BLM’s Preferred Alternative, Alternative B. However, in response to public comments and input from the Cooperating Agencies, other Federal and State agencies, tribal governments, and local governmental entities, components of the other alternatives that were presented in the draft plans and analyzed in the Draft EIS were selected to comprise management decisions in the Proposed RMPs and Proposed Amendment. In some cases, minor edits or clarifications were made and these are shown in italicized text surrounded by brackets in the proposed plans. None of the minor edits or clarifications required modifications to the analysis of the environmental consequences presented in Chapter 4 of the Draft EIS. The BLM has prepared an abbreviated Final EIS to support the Proposed NCA RMPs and Proposed Amendment, consistent with Federal regulations at 40 CFR 1503.4 (c). The resulting Proposed RMPs and Proposed Amendment address the range of public, agency, and governmental concerns about resource management and land uses in the planning area raised during the planning process, and meet the Congressionally-defined purposes of the NCAs and OPLMA’s mandates related to public land management in Washington County.

**Background**

The Zortman Ranger Station, built in 1905, was part of the Lewis and Clark National Forest until 1965, when management of public lands in the area was transferred to the BLM. The site includes the four-room main building, a storage shed, and amphitheater which was built for the Lewis and Clark Bicentennial celebration. The main building is eligible for listing on the National Register of Historic Places. In 2013, the BLM partnered with the Forest Service's historic preservation team to repair the outside of the main building and landscape the yard to divert runoff which was undermining the foundation. The interior of the building has been inventoried and abated for asbestos and lead paint. The site also features an amphitheater which is used for interpretive presentations.

Buffington Day Use Area is located within the Camp Creek Recreation Area just northeast of Zortman, Montana.
