

standard with a highly reproducible measure.

Aside from the clarity of its use as an enforcement tool, the APA standard is also familiar to industry. Not only does it reflect the work of a voluntary standard development organization in which industry members participated, it has been incorporated by reference into the Department of Transportation's regulations for the shipment of fireworks.⁸ Under this interpretation, CPSC will be testing fireworks devices in line with the APA standard when determining which devices are intended to produce an audible effect.

B. Interpretive Rule

For the foregoing reasons, the Commission proposes to interpret the phrase "Fireworks devices intended to produce audible effects" in a manner consistent with the APA voluntary standard and DOT regulations. Under this interpretation, the Commission will consider the presence in the burst (or break) charge of a fireworks device of metallic powder less than 100 mesh in particle size to mean that the device is intended to produce an audible effect. Likewise, if the device lacks such metallic powder, staff will consider it as not intended to produce an audible effect. This change, as noted above, will not alter the rule or any party's obligations under it in any way, but it will allow the Commission to enforce that rule more efficiently.

C. Request for Comment

The Commission requests comments on all aspects of the proposed interpretation. In particular, given the handmade nature of these products, the Commission requests comments on whether there should be an allowance for contamination at a level that would not pose an injury hazard to fireworks users or bystanders. We seek comments to determine whether we can exercise some flexibility in enforcement. We would not be setting an enforceable contamination allowance but, in an enforcement proceeding, we may consider allowing some contamination if we receive information supporting the position that inadvertent low level contamination by these metals can occur in the manufacturing process.

If so, please provide the CPSC information and data regarding what an appropriate allowance should be.

In light of the foregoing, and in response to the MFA request, by this **Federal Register** release the Commission is extending the comment period for the Proposal for two weeks, until September 20, 2016.
