FOR FURTHER INFORMATION CONTACT: Barbara Barron, Office of Standards, Regulations, and Variances at 202-693-9447 (Voice), barron.barbara@dol.gov (Email), or 202-693-9441 (Facsimile). [These are not toll-free numbers.]

SUPPLEMENTARY INFORMATION:

I. Background

Section 101(c) of the Federal Mine Safety and Health Act of 1977 (Mine Act) allows the mine operator or representative of miners to file a petition to modify the application of any mandatory safety standard to a coal or other mine if the Secretary of Labor determines that:

1. An alternative method of achieving the result of such standard exists which will at all times guarantee no less than the same measure of protection afforded the miners of such mine by such standard; or

2. That the application of such standard to such mine will result in a diminution of safety to the miners in such mine.

In addition, the regulations at 30 CFR 44.10 and 44.11 establish the requirements and procedures for filing petitions for modification.

II. Petitions for Modification

Docket Number: M-2016-026-C.

Petitioner: Mountain Coal Company, P.O. Box 591, 5174 Highway 133, Somerset, Colorado 81434.

Mine: West Elk Mine, MSHA I.D. No. 05-03672, located in Gunnison County, Colorado.

Regulation Affected: 30 CFR 75.1108(c) (Approved conveyor belts).

Modification Request: The petitioner requests a modification of the existing standard to permit continued use of an in-service underground conveyor belt approved under Part 18 for the E Seam development and longwall mining of panels 7, 8, 9, 10, 11, and 12 utilizing the stipulations specified in below.

In the alternative to compliance with 30 CFR 75.1108(c), the petitioner proposes the following:

(1) All underground conveyor belts used in B and F Seam will be approved under Part 14.

(2) A Part 14 approved underground conveyor belt will be utilized to replace any E seam underground conveyor belt that requires replacement due to damage.

(3) Spacing between existing carbon monoxide sensors in the E Seam belt entries will be reduced from 1,000 feet to 800 feet.

(4) E Seam belt entries will be traveled in their entirety by a trained person at least every four hours when the belt(s) are operating.

The petitioner asserts that the proposed alternative method will provide a level of safety equal to that provided by the existing standard.

Sheila McConnell,

Director, Office of Standards, Regulations, and Variances.

SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (i.e., employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing collection of information requirements in accord with the Paperwork Reduction Act (PRA) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information
