Abstract: Owners and operators of affected facilities are required to comply with reporting and/or record keeping requirements for the NESHAP General Provisions at 40 CFR part 63, subpart A, as well as for the specific requirements at 40 CFR part 63, subpart R. This includes submitting initial notification reports, performance tests and periodic reports and results, maintaining records of the occurrence and duration of any startup, shutdown or malfunction in the operation of an affected facility or any period during which the monitoring system is inoperative, and maintaining records of annual certification testing if

an area source is within 50 percent of major source threshold criteria. These reports are used by EPA to determine compliance with the standards.

Form numbers: None.

Respondents/affected entities: Bulk gasoline terminals.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart R).

Estimated number of respondents: 492 (total).

Frequency of response: Initially and semiannually.

Total estimated burden: 15,900 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$2,000,000 (per year), which includes \$357,000 in either annualized capital/startup or operation & maintenance costs.

Changes in the estimates: There is an adjustment increase in the total estimated burden as currently identified in the OMB Inventory of Approved Burdens. This increase is not due to any program changes. The small change in the burden and cost estimates occurred because of a change in assumption. This ICR assumes all sources will have to familiarize themselves with the regulatory requirements each year.

Director, Regulatory Support Division.
