As discussed above, some entities may choose to implement a physical label. From previous documentation for Part 567 labels,⁵ the cost of the physical label to approximately \$1 per label. This takes into account 3 minutes to install

the label along with the actual cost of the label. For the smaller fleets of HAVs, it is expected that this number will be more expensive per vehicle. NHTSA estimates that fleets will not exceed approximately 300 vehicles during the

lifespan of the current ICR, and that the cost of labeling, including cost to design, print, and affix labels to be approximately \$10 per vehicle. For 30 fleets of 300 cars each, this represents a cost burden of \$90,000.
