SUPPLEMENTARY INFORMATION:

Background

The International Organization of Legal Metrology (OIML) is an intergovernmental treaty organization in which the United States and 60 other nations are members. Its principal purpose is to harmonize national laws and regulations pertaining to testing and verifying the performance of legal measuring instruments used for equity in commerce, for public and worker health and safety, and for monitoring and protecting the environment. The harmonized results promote the international trade of measuring instruments and products affected by measurement.

The U.S. Department of State has delegated technical participation in OIML to NIST. NIST coordinates participation of U.S. manufacturers, users of weighing and measuring instruments, legal metrology officials and other U.S. stakeholders in the technical work of OIML by circulating draft voluntary standards (called Recommendations) and other OIML publications for comment. NIST also leads U.S. delegations to OIML Technical Meetings.

Additional Information

All parties with an interest in the work of the OIML are requested to review and submit comments on any or all of the 16 Recommendations and Documents that will be presented for ratification by the Conference. Any submitted comments will be reviewed and considered by NIST staff in the development of U.S. positions that will be put forward at the 15th Conference of OIML. NIST will consider all feedback and will implement it into the Conference as appropriate.

Each of the 16 Recommendations and Documents that will be presented for ratification by the Conference has already gone through a multi-year development and review process involving technical experts and legal metrology experts from the United States and around the world. Ratification by the Conference is the final step in this process. The Recommendations and Documents have been divided into two categories—Category 1: Those already approved by

the International Committee of Legal Metrology (CIML) between 2013 and 2015, and Category 2: Those that are expected to be submitted directly to the Conference for ratification. Because the Recommendations and Documents in Category 2 have not yet received CIML approval, the comments received on these Recommendations and Documents are of additional importance to NIST staff. The 16 Recommendations and Documents and the OIML-member nations that held the convenership of the project group responsible for their development are listed below:
