SUPPLEMENTARY INFORMATION:

I. Discussion

The NRC is issuing a revision to an existing guide in the NRC's "Regulatory Guide" series. This series was developed to describe and make available to the public information regarding methods that are acceptable to the NRC staff for implementing specific parts of the agency's regulations, techniques that the NRC staff uses in evaluating specific issues or postulated events, and data that the NRC staff needs in its review of applications for permits and licenses.

Revision 1 of RG 5.12 was issued with a temporary identification of Draft Regulatory Guide, DG-5027. It incorporates new information, lessons learned, and operating experience since the guide was originally issued in 1973, particularly new locking technologies and standards for locks and keys. Some specific items addressed include the basic characteristics of a lock that licensees should consider when selecting locks, and information on when licensees should change combinations or keys. In addition, references in the RG were updated, a reference to an industry dictionary of lock terminology was added to aid in reader understanding of the technical aspects of lock systems, and the relevant regulations were identified. Furthermore, the title of the guide was revised to include the broadened scope of the guide. The original scope of the guide included control and protection of facilities and special nuclear material (SNM). The revised scope of the guide now includes control and protection of: (1) Classified information/matter, (2) safeguards information, (3) an aggregated Category 1 or Category 2 quantity of radioactive material listed in appendix A to part 37 of title 10 of the *Code of Federal Regulations* (10 CFR), and (4) spent nuclear fuel.

II. Additional Information

The DG-5027, was published in the **Federal Register** on January 2, 2015 (80 FR 53) for a 60-day public comment period. The public comment period closed on March 3, 2015. Public comments on DG-5027 and the NRC staff's responses to the public comments are available in ADAMS under Accession No. ML15357A410.
