

cash deposit rate for all other producers or exporters will continue to be 5.24 percent,¹³ the all-others rate established in the less-than-fair-value investigation. These cash deposit requirements, when imposed, shall remain in effect until further notice.

Notification to Importers

This notice serves as a preliminary reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this POR. Failure to comply with this requirement could result in the Department's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

Notification to Interested Parties

The Department is issuing and publishing these results in accordance with sections 751(a)(1) and 777(i) of the Act.

Dated: October 5, 2016.

Ronald K. Lorentzen,

Acting Assistant Secretary for Enforcement and Compliance.

Atlantic Highly Migratory Species; Essential Fish Habitat

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public hearings.

SUMMARY: On September 8, 2016, NMFS published a notice of availability of the Draft Environmental Assessment for Amendment 10 to the 2006 Consolidated Atlantic Highly Migratory Species (HMS) Fishery Management Plan (FMP). The purpose of this Draft Amendment is to update Atlantic HMS Essential Fish Habitat (EFH) with recent information following the EFH delineation methodology established in Amendment 1 to the 2006 Consolidated Atlantic HMS FMP (Amendment 1); update and consider new Habitat Areas of Particular Concern (HAPCs) for Atlantic bluefin tuna and sandbar,

¹⁴ On September 21, 2016, the Department published the final results of a changed circumstances review with respect to OCTG from Korea, finding that Hyundai Steel is the successor-in-interest to Hyundai HYSCO for purposes of determining antidumping duty cash deposits and liabilities. See *Notice of Final Results of Antidumping Duty Changed Circumstances Review: Oil Country Tubular Goods From the Republic of Korea*, 81 FR 64873 (September 21, 2016). lemon, and sand tiger sharks based on recent information, as warranted; minimize to the extent practicable the adverse effects of fishing and non-fishing activities on EFH; and identify other actions to encourage the conservation and enhancement of EFH. NMFS announces two public hearing conference calls/webinars to allow opportunities for interested members of the public from all geographic areas to submit verbal comments on Draft Amendment 10.

DATES: NMFS will host public hearing conference calls/webinars on November 10, 2016, from 3 to 5 p.m. EST and November 18, 2016, from 10 a.m. to 12 p.m. EST. Written comments on Draft Amendment 10 will be accepted until December 22, 2016.

ADDRESSES: Two public hearing conference calls/webinars will be conducted. See **SUPPLEMENTARY INFORMATION** for information on how to access the conference calls/webinars. More information about Draft Amendment 10, including how to submit written comments, may be found at <http://www.fisheries.noaa.gov/sfa/hms/documents/fmp/am10/index.html>. **FOR FURTHER INFORMATION CONTACT:** Jennifer Cudney or Randy Blankinship at (727) 824-5399.

SUPPLEMENTARY INFORMATION: The Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act) includes provisions concerning the identification and conservation of EFH (16 U.S.C. 1801 *et seq.*). EFH is defined at 50 CFR 600.10 as "those waters and substrate necessary to fish for spawning, breeding, feeding, or growth to maturity." NMFS must identify and describe EFH, minimize to the extent practicable the adverse effects of fishing on EFH, and identify actions to encourage the conservation and enhancement of EFH (§ 600.815(a)). Federal agencies that authorize, fund, or undertake actions that may adversely affect EFH must consult with NMFS (§ 600.920(a)), and NMFS must provide comments and EFH conservation recommendations to Federal or state agencies regarding any such actions (§ 600.905).

In addition to identifying and describing EFH for managed fish species, a review of EFH must be completed every 5 years, and EFH provisions must be revised or amended, as warranted, based on the best available scientific information. NMFS announced the initiation of this review and solicited information for compilation for the draft review from the public in a **Federal Register** notice

¹³ See *Certain Oil Country Tubular Goods From the Republic of Korea: Notice of Court Decision Not in Harmony With Final Determination*, 81 FR 59603 (August 30, 2016).

on March 24, 2014 (79 FR 15959). The initial public review/submission period ended on May 23, 2014. The Draft Atlantic HMS EFH 5-Year Review was made available on March 5, 2015 (80 FR 11981), and the public comment period ended on April 6, 2015. NMFS analyzed the information gathered through the EFH review process, and the Notice of Availability for the Final Atlantic HMS EFH 5-Year Review was published on July 1, 2015 (80 FR 37598). As a result of this review, NMFS determined that a revision of HMS EFH was warranted, and that an amendment to the 2006

Consolidated Atlantic HMS FMP would be developed as Amendment 10. On September 8, 2016 (81 FR 62100), NMFS published a notice of availability of the Draft Environmental Assessment for Amendment 10 to the 2006 Consolidated Atlantic HMS FMP. Specific actions analyzed included the update and revision of existing HMS EFH, as warranted; modification of existing HAPCs or designation of new HAPCs for bluefin tuna and sandbar, lemon, and sand tiger sharks, as warranted; and analysis of fishing and non-fishing impacts on EFH by

considering environmental and management changes and new information since 2009.
