**SUPPLEMENTARY INFORMATION:** The purpose of this public workshop is to provide an opportunity for stakeholders, including scientists from government, academia, and industry, patient advocacy groups, clinicians, pharmacists, and the general public to discuss marketed generic drugs. Generic drugs account for 88 percent of prescriptions in the United States. In light of the significant contributions of generic drugs to public health, it is important that tools are developed to monitor marketed generic drugs to ensure that they have the same safety and effectiveness as their reference listed drug. Specifically, this workshop will include presentations on: (1) Current generic drug surveillance practices at FDA and in industry, (2) public perception of generic drug quality and effectiveness, (3) generic drug substitution studies in patients, and (4) development of methods and tools to conduct postmarket surveillance of generic drugs. The workshop will include four panel sessions for interaction and discussion among the speakers and attendees.

*Agenda:* The agenda is available at <http://www.fda.gov/scienceresearch/specialtopics/regulatoryscience/ucm521545.htm>.

*Registration:* There is no registration fee to attend this public workshop. Seats are limited and registration will be on a first-come, first-served basis. Advance registration is required and is online only at <http://www.fda.gov/scienceresearch/specialtopics/regulatoryscience/ucm521545.htm>. There will be no day-of, onsite registration.

*Streaming Webcast of the Public Workshop:* This public workshop will also be Webcast. There is no registration fee for access to the workshop via the Webcast, but registration is still required. #### SUPPLEMENTARY INFORMATION:

##### I. Background

FDA is announcing the availability of a guidance for industry entitled "ANDA Submissions—Prior Approval Supplements Under GDUFA." On July 9, 2012, the President signed GDUFA (Pub. L. 112-144, Title III) into law. GDUFA is based on an agreement negotiated by FDA and representatives of the generic drug industry to address a growing number of regulatory challenges. GDUFA aims to ensure timely access to safe, high-quality, affordable generic drugs. GDUFA enables FDA to assess user fees to fund critical and measurable improvements to FDA's generic drugs program and to bring greater predictability and timeliness to the review of generic drug applications.

GDUFA requires that FDA and human generic drug manufacturers meet certain commitments. In the GDUFA Commitment Letter, FDA committed to review and act on a certain percentage of PASs within a specified period from the date of submission for receipts in fiscal years 2015 to 2017. The percentage of PASs that FDA has committed to review and act on increases with each fiscal year, and the deadlines for review depend on whether a PAS requires an inspection.

This guidance describes the performance metric goals to which FDA agreed in the Commitment Letter and clarifies how FDA will review a PAS and amendments to a PAS for an ANDA subject to the GDUFA performance metric goals. The GDUFA performance metrics described in this guidance only apply to ANDA applicants who electronically submit a PAS on or after October 1, 2014. These performance metrics do not apply to new drug applications (NDAs), biologics license applications (BLAs), supplements filed for NDAs or BLAs, or changes being effected supplements and annual report filings to NDAs, BLAs, or ANDAs.

This guidance finalizes the draft guidance that was issued under the same title on July 11, 2014 (79 FR 40112), and reflects FDA's consideration of public comments on the draft guidance. Generally, FDA revised the

draft guidance to provide clarifying and explanatory information that will assist human generic drug manufacturers with PAS submissions. Changes from the draft guidance include clarification on the point at which a PAS is deemed submitted to FDA and a description of the process through which applicants may request FDA reconsider its supplement reporting category determination. The draft guidance and related public comments are publicly available in Docket No. FDA-2014-D-0901.

This guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The guidance represents the current thinking of FDA on "ANDA Submissions—Prior Approval Supplements Under GDUFA." It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

## II. Paperwork Reduction Act of 1995

This guidance refers to previously approved collections of information found in FDA regulations. These collections of information are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520). The collections of information for supplements and amendments in 21 CFR part 314 have been approved under OMB control number 0910–0001. The collection of information for manufacturer registration in 21 CFR part 207 has been approved under OMB control number 0910–0045. The collection of information for manufacturer compliance with current good manufacturing practices in 21 CFR part 211 has been approved under OMB control number 0910–0139.
