

foreign entity should be reported as an LLC. After review and consideration, the Federal Reserve decided not to make these changes. Given the vast number of diverse organizational structures, the Federal Reserve believes that it is up to each respondent to apply judgement in determining whether a particular entity type fits within the legal entity structures listed in the form, including whether a foreign entity should be reported as an LLC. If a respondent determines that a business organization does not fit within any of the legal entity structures listed in the form, including the definition of LLC, it may report the legal entity as "Other" and provide a description of its unique characteristics.

The commenter requested clarification on how to report ownership interests in LLCs when the organization's governing documents are silent regarding the designation of a managing member and where an entity is designated as a manager (*i.e.*, actively manages the day-to-day operation of the LLC), but has no ownership interest in the LLC. In addition, the commenter suggested that a flowchart be provided in the instructions to indicate how to report these interests. After review and consideration, the Federal Reserve decided not to make these changes. Since each respondent's relationship with the LLC will vary and the determination of whether to report its ownership interest as a managing or non-managing member may depend upon a combination of factors, including applicable state laws, the respondent should consult with its legal staff to take into account these unique facts and circumstances and report its interest in the manner it deems most appropriate.

The commenter requested an established and consistent process for withdrawing an erroneous FR Y-10 report that should not have been filed. The Federal Reserve support incorporating procedures for this process and will consider adding them as part of a future proposal.

Finally, the commenter requested several other technical enhancements to the FR Y-10 online application: (1) Establish a process for withdrawing an FR Y-10 report that should not have been filed, (2) add straight-through processing of the FR Y-10 either directly from internal systems or through a data load process, (3) add a notification that informs the reporter after an event has been processed, (4) add foreign branch entities, (5) remove restriction in the FR Y-10 online application to allow reporters that own interest in the same entity to report their

holdings differently, and (6) update the RSSD search function. The Federal Reserve need additional time to investigate whether these enhancements are feasible and may consider them as a part of a future proposal as costs and resources permit.
