### Certain Hot-Rolled Flat-Rolled Carbon-Quality Steel Products From the Russian Federation: Continuation of Antidumping Duty Order

**AGENCY:** Enforcement and Compliance, International Trade Administration, Department of Commerce.

**SUMMARY:** As a result of the determinations by the Department of Commerce (the Department) and the U.S. International Trade Commission (USITC) that revocation of the antidumping duty order on certain hot-rolled flat-rolled carbon-quality steel products (hot-rolled steel) from the Russian Federation (Russia) would

likely lead to continuation or recurrence of dumping and material injury to an industry in the United States, the Department is publishing a notice of continuation of this antidumping duty order.

**DATES:** *Effective date:* October 20, 2016.

**FOR FURTHER INFORMATION CONTACT:** Dena Crossland, AD/CVD Operations, Office VI, Enforcement and Compliance, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230; telephone (202) 482-3362.

### SUPPLEMENTARY INFORMATION:

#### Background

On December 24, 2014, the Department published the antidumping duty order on hot-rolled steel from Russia.<sup>1</sup> On May 2, 2016, the Department initiated a sunset review of the *Russia Order* pursuant to section 751(c) of the Tariff Act of 1930, as amended (the Act).<sup>2</sup>

As a result of this sunset review, the Department determined that revocation of the *Russia Order* would likely lead to continuation or recurrence of dumping and, therefore, notified the USITC of the magnitude of the margins of dumping likely to prevail should the order be revoked.<sup>3</sup>

On October 5, 2016, the USITC published its determination, pursuant to section 751(c) of the Act, that revocation of the *Russia Order* would be likely to lead to continuation or recurrence of material injury to an industry in the United States within a reasonably foreseeable time.<sup>4</sup>

#### Scope of the Order

For the purposes of this order, “hot-rolled steel” means certain hot-rolled flat-rolled carbon-quality steel products of a rectangular shape, of a width of 0.5 inch or greater, neither clad, plated, nor coated with metal and whether or not painted, varnished, or coated with plastics or other non-metallic substances, in coils (whether or not in

successively superimposed layers) regardless of thickness, and in straight lengths, of a thickness less than 4.75 mm and of a width measuring at least 10 times the thickness.

Universal mill plate (*i.e.*, flat-rolled products rolled on four faces or in a closed box pass, of a width exceeding 150 mm but not exceeding 1250 mm and of a thickness of not less than 4 mm, not in coils and without patterns in relief) of a thickness not less than 4.0 mm is not included within the scope of this order.

Specifically included in this scope are vacuum degassed, fully stabilized (commonly referred to as interstitial-free (IF)) steels, high strength low alloy (HSLA) steels, and the substrate for motor lamination steels. IF steels are recognized as low carbon steels with micro-alloying levels of elements such as titanium and/or niobium added to stabilize carbon and nitrogen elements. HSLA steels are recognized as steels with micro-alloying levels of elements such as chromium, copper, niobium, titanium, vanadium, and molybdenum. The substrate for motor lamination steels contains micro-alloying levels of elements such as silicon and aluminum.

Steel products to be included in the scope of this order, regardless of Harmonized Tariff Schedule of the United States (HTSUS) definitions, are products in which: (1) Iron predominates, by weight, over each of the other contained elements; (2) the carbon content is 2 percent or less, by weight; and (3) none of the elements listed below exceeds the quantity, by weight, respectively indicated: 1.80 percent of manganese, or 1.50 percent of silicon, or 1.00 percent of copper, or 0.50 percent of aluminum, or 1.25 percent of chromium, or 0.30 percent of cobalt, or 0.40 percent of lead, or 1.25 percent of nickel, or 0.30 percent of tungsten, or 0.012 percent of boron, or 0.10 percent of molybdenum, or 0.10 percent of niobium, or 0.41 percent of titanium, or 0.15 percent of vanadium, or 0.15 percent of zirconium.

All products that meet the physical and chemical description provided above are within the scope of this order unless otherwise excluded. The following products, by way of example, are outside and/or specifically excluded from the scope of this order:

- Alloy hot-rolled steel products in which at least one of the chemical elements exceeds those listed above (including *e.g.*, ASTM specifications A543, A387, A514, A517, and A506).
- SAE/AISI grades of series 2300 and higher.
- Ball bearing steels, as defined in the HTSUS.

#### Continuation of the Order

As a result of the determinations by the Department and the USITC that revocation of the *Russia Order* would be likely to lead to continuation or recurrence of dumping and material injury to an industry in the United States, pursuant to section 751(d)(2) of the Act, the Department hereby orders the continuation of the *Russia Order*.

U.S. Customs and Border Protection will continue to collect cash deposits of estimated antidumping duties at the rates in effect at the time of entry for all imports of subject merchandise. The effective date of the continuation of this order will be the effective date listed

above. Pursuant to section 751(c)(2) of the Act, the Department intends to initiate the next sunset review of this order not later than 30 days prior to the fifth anniversary of the effective date of continuation.

This five-year (sunset) review and this notice are in accordance with sections 751(c) and 777(i)(1) of the Act and 19 CFR 351.218(f)(4).

#### **SUPPLEMENTARY INFORMATION:**

##### **I. Abstract**

This request is for extension of a currently approved information collection.

Management of and regulations for Pacific halibut in Alaska are developed on the international, Federal, and state levels by the International Pacific Halibut Commission (IPHC), the North Pacific Fishery Management Council (Council), National Marine Fisheries Service (NMFS), Alaska Region and the State of Alaska Department of Fish and Game (ADF&G). The IPHC and NMFS manage fishing for Pacific halibut through regulations established under authority of the Convention between the United States Halibut Fishery of the Northern Pacific Ocean and Bering Sea (Convention), the Northern Pacific Halibut Act of 1982, 16 U.S.C. 773c (Halibut Act), and Section 303(b) of the Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1801 *et seq.*). Regulations that implement this collection-of-information are found at 50 CFR part 300.60 through 300.66 and at 50 CFR 679.5(l)(7).

Annual catch quotas are determined by the IPHC, and Federal responsibility for halibut management extends to halibut stocks and fishing activity within State of Alaska waters. In order to manage halibut effectively, international and Federal managers need information on halibut fishing effort and harvest by all user groups, including the guided sport charter sector of the fishery.

Federal regulations at 50 CFR 300.65 require charter vessel operators fishing in IPHC Areas 2C and 3A to comply with the ADF&G annual registration of sport fishing guides and businesses and ADF&G saltwater charter halibut logbook. NMFS and ADF&G coordinate closely in the development of this information collection for the monitoring and enforcement of the charter vessel catch limit of halibut.

A Catch Sharing Program was developed in IPHC Regulatory Areas 2C and 3A for the guided sport and commercial fisheries which authorized commercial halibut quota share (QS) holders to transfer individual fishing quota (IFQ) as guided angler fish (GAF)
