SUPPLEMENTARY INFORMATION:

I. Background

In accordance with section 51.118 of title 10 of the *Code of Federal Regulations*, the NRC is issuing NUREG-2176, "Environmental Impact Statement for Combined Licenses (COLs) for Turkey Point Nuclear Plant, Units 6 and 7." A notice of availability of the draft EIS was published by the NRC in the **Federal Register** on March 5, 2015 (80 FR 12043) and also noticed by the U.S. Environmental Protection Agency on March 6, 2015 (80 FR 12172). The public comment period closed on May 22, 2015. During the course of the comment period, the NRC received requests from members of the public, a Tribal government and Federal agencies to extend the comment period. The NRC reopened the comment period on the draft EIS from May 28, 2015, until July 17, 2015 (80 FR 30501); public comments are addressed in Appendix E in the final EIS. The final EIS is available for public inspection as indicated in the **ADDRESSES** section of this document.

The final EIS also supports the USACE's review and was prepared in accordance with the National Environmental Policy Act of 1969, as amended. The final EIS also supports the Department of the Army's permit application for certain construction activities at the proposed Turkey Point, Units 6 and 7 site. The USACE's Department of the Army permit application number for Turkey Point, Units 6 and 7 project is (SAJ)-2009-

02417). The USACE's Public Interest Review will be part of its Record of Decision and is not addressed in the final EIS.

II. Discussion

As discussed in the final EIS, the NRC staff's recommendation related to the environmental aspects of the proposed action is that the COLs should be issued. This recommendation is based on: (1) The Environmental Report (ER) submitted by FPL, as revised; (2) consultation with Federal, State, Tribal, and local agencies; (3) the NRC staff's independent review; (4) the NRC staff's consideration of comments received during the environmental review; and (5) the assessments summarized in the final EIS, including the potential mitigation measures identified in the ER and in the final EIS. In addition, in making its recommendation, the NRC staff has concluded that there are no environmentally preferable or obviously superior sites in the region of interest.

Dated at Rockville, Maryland, this 27th day of October, 2016.
