Case No.: 1:16-cv-02147

Complaint

The United States of America, acting under the direction of the Attorney General of the United States, brings this civil antitrust action to enjoin the proposed acquisition of Faiveley Transport S.A. and Faiveley Transport North America (collectively, "Faiveley") by Westinghouse Air Brake Technologies Corporation ("Wabtec") and to obtain other equitable relief. The United States alleges as follows:

I. Introduction

1. Wabtec proposes to acquire Faiveley, a global provider of railway

brake equipment components that make up a critical system intimately linked to both the performance and safety of trains. Faiveley produces its brake system components in the United States through its subsidiary, Faiveley Transport North America. Wabtec is a leading manufacturer of rail equipment used in the assembly of freight cars built for use in the U.S. freight rail network. For purchasers of components of freight car brake systems, Wabtec and Faiveley are two of the top three suppliers approved by the Association of American Railroads ("AAR"), with combined market shares ranging from approximately 41 to 96 percent for many of the products in which they compete. Where a product must be AAR approved, customers must source it from an AAR-approved supplier of that product.

2. In 2010, Faiveley entered into a joint venture with Amsted Rail Company, Inc. ("Amsted"), a rail equipment supplier based in Chicago, Illinois, to form Amsted Rail Faiveley LLC ("ARF"). Faiveley owns 67.5 percent of ARF and Amsted owns the remaining 32.5 percent interest in the joint venture. As part of the joint venture, all of the freight car brake system components that are manufactured by Faiveley Transport North America are marketed and sold to customers by Amsted. Amsted and Faiveley do not compete for the sale of brake system components. Critically, the joint venture allows Faiveley to bundle brake components with Amsted's other products such as wheels and axles, thereby increasing its ability to compete for the sale of freight car brake system components.

3. Wabtec's proposed acquisition of Faiveley would eliminate head-to-head competition in the development, manufacture, and sale of several components of freight car brake systems in the United States. The proposed acquisition likely would give Wabtec the incentive and ability to raise prices or decrease the quality of service provided to customers in the railroad freight industry. The proposed acquisition also would eliminate future competition for control valves, the most safety-critical component on a freight car. If approved, the proposed acquisition would eliminate the entry of Faiveley into this market, thus maintaining a century-old duopoly between Wabtec and its only other control valve rival, and reducing the two incumbent control valve suppliers' incentive to compete.

4. Accordingly, the proposed acquisition likely would substantially lessen existing and future competition
