SUPPLEMENTARY INFORMATION:**A. Purpose**

To protect the Government’s interest and to ensure timely delivery of items of the requisite quality, contracting officers, prior to award, must make an affirmative determination that the prospective contractor is responsible, *i.e.*, capable of performing the contract. Before making such a determination, the contracting officer must have in his possession or must obtain information sufficient to satisfy himself that the prospective contractor: (i) Has adequate financial resources, or the ability to obtain such resources; (ii) is able to comply with required delivery schedule; (iii) has a satisfactory record of performance; (iv) has a satisfactory record of integrity; and (v) is otherwise qualified and eligible to receive an award under appropriate laws and regulations. If such information is not in the contracting officer’s possession, it is obtained through a preaward survey conducted by the contract administration office responsible for the plant and/or the geographic area in which the plant is located. The necessary data is collected by contract administration personnel from available data or through plant visits, phone calls, and correspondence. This data is entered on Standard Forms 1403, 1404, 1405, 1406, 1407, and 1408 in detail commensurate with the dollar value and complexity of the procurement. These standard forms are not cumulative. The surveying activity completes only the applicable standard form(s) necessary to determine contractor responsibility in each case.

B. Annual Reporting Burden

There are no Governmentwide systems for collecting the number of preaward surveys completed in a fiscal year as preaward surveys are only required in limited circumstances where information for the prospective contractor cannot be obtained by the contracting officer to make an affirmative statement of responsibility. Further, if the contemplated contract will have a fixed price at or below the

\$150,000 simplified acquisition threshold (SAT) or will involve the acquisition of commercial items (see Part 12); the contracting officer should not request a preaward survey unless circumstances justify its cost.

Using parameters identified above a Federal Procurement Data System (FPDS) ad hoc report was completed identifying that in Fiscal Year (FY) 2015 an estimated total of 24,791 contracts were awarded Governmentwide that were over the SAT, and for which commercial acquisition procedures were not used. Of that number, it is estimated that preaward surveys were completed for 15 percent, or 3,719 of the 24,791 contracts that were awarded. Of the six Standard Forms (1403, 1404, 1405, 1406, 1407, and 1408), we estimated that Standard Form 1403 is used most frequently because it is a general form and accounts for 30 percent or 1,116 times, Standard Forms 1404 and 1407 account for 15 percent or 558 times, Standard Form 1408 accounts for 20 percent or 744 times, and Standard Forms 1405 and 1406 account 10 percent or 372 times.

After consultation with subject matter experts, it was determined that the time required to prepare and complete the Standard Forms is estimated at 24 hours per response. Because preaward survey data is generally used for multiple contracts awarded within a 12 month period, it is estimated that only one (1) response would be reported annually per respondent per form.

SUPPLEMENTARY INFORMATION:

A. Purpose

The Privacy Act of 1974, (5 U.S.C. 552a) prescribes fair information practices for the collection, maintenance, use, and dissemination of personal information by Federal agencies. Consistent with the provisions of the Privacy Act of 1974, OMB Circular A-130, “Managing Information as a Strategic Resource,” and other OMB memoranda, this rule specifically addresses the recordkeeping and reporting associated with FAR clause 52.224-XX, “Privacy Training.” The clause is used in solicitations and contracts whenever contract performance requires the employees of the contractor (or the employees of subcontractors) to have access to personally identifiable information (PII), including access to a system of records on individuals or entails the design, development, maintenance, or the operation of a system of records on individuals. The recordkeeping effort involves maintenance of training completion documentation by contractors; the reporting covers submission of the training completion documentation to the contracting officer upon request. It is anticipated that the Government would request this documentation only rarely.

B. Discussion and Analysis

DoD, GSA, and NASA provided notification of the applicability of the Paperwork Reduction Act and requested approval for a new information collection requirement as part of FAR Case 2010-013, published at 76 FR 63896, on October 14, 2011. Two respondents commented on the annual burden estimate.

Comment: The respondents stated that the annual burden estimate with respect to the public’s Paperwork Reduction Act reporting burden was understated. The respondents believed that (a) requiring contractors to conduct their own privacy training and (b)
