

has established more than 400 CBLs throughout the United States in cooperation with various government agencies, universities, professional societies, and others. All data and products associated with this nationwide program are available at the CBL Program Web page: <http://www.geodesy.noaa.gov/CBLINES/calibration.html>.

Currently the establishment/reestablishment of a local CBL requires on-site supervision by NGS personnel and the use of NGS-owned instrumentation. NGS resource constraints can limit administration of the program and the number of CBLs that can be established and reestablished.

The Director of NOAA's National Geodetic Survey invites interested parties to submit comments to assist NGS as it decides how to maintain the CBL Program into the future. Comments may address any aspect of the CBL Program. Specifically, the Director seeks comments regarding:

1. CBLs located within your local area or state that are important to your organizational activities.
2. Whether proposed changes in the CBL Program policy and procedures impose a hardship on your organization.
3. Whether proposed changes in the CBL Program policy and procedures will be beneficial to your organization.

Dated: November 1, 2016.
