SUPPLEMENTARY INFORMATION:

I. Background

In accordance with the Privacy Act of 1974, 5 U.S.C. 552a, the Department of Homeland Security (DHS) United States Coast Guard proposes to establish a new DHS system of records titled, “DHS/United States Coast Guard-031 USCG Law Enforcement (ULE) System of Records.”

The collection and maintenance of this information will allow the DHS/USCG to collect and maintain records regarding maritime law enforcement, security, marine safety, and environmental protection activities. USCG Law Enforcement consists of certain records that were formerly covered under the DHS/USCG-013 Marine Information for Safety and Law Enforcement (MISLE) system of records. These records are being moved under ULE to maintain USCG law enforcement and case-related data in one repository. In addition to the transfer of this law enforcement data out from under MISLE to ULE, this notice also serves to inform that USCG Biometrics at Sea System records, which are collected under the purpose and identified authorities cited herein, are maintained in the Automated Biometric Identification System (IDENT)—the DHS biometric repository maintained by the DHS Office of Biometric Identity Management. Separately and elsewhere in the **Federal Register**, the remaining portions of the records covered under MISLE will be republished under two new systems of records: The Vessel Identification System and the Merchant Vessel Documentation System. The MISLE SORN will be retired upon the publication of all three new systems of records.

USCG Law Enforcement may contain information on persons who come into contact with USCG through its law enforcement, safety, and environmental protection activities, including vessel and facility owners, operators, crew, employees, passengers, and other persons associated with a USCG law enforcement or environmental protection activity or having an interest in the subject vessel or facility involved or identified in the respective case file. Consistent with the authority being enforced, ULE collects and maintains in case files both biographic and, as appropriate, references to biometric records obtained from individuals and persons, as well as identifying information relating to ownership, registry, and location of vessels and facilities.

Consistent with DHS’s information-sharing mission, information stored in the DHS/USCG-031 USCG Law Enforcement (ULE) System of Records may be shared with other DHS components that have a need to know the information to carry out their national security, law enforcement, immigration, intelligence, or other homeland security functions. In addition, information may be shared with appropriate federal, state, local, tribal, territorial, foreign, or
