Animal Plant and Health Inspection Service

Title: Irradiation Phytosanitary Treatment for Fresh Fruits and Vegetables.

OMB Control Number: 0579-0155.

Summary of Collection: Under the Plant Protection Act (7 U.S.C. 7701-7772), the Animal and Plant Health Inspection Service (APHIS) is authorized, among other things, to regulate the importation of plants, plant products, and other articles to prevent the introduction of plant pests into the United States. The regulations in 7 CFR 319 include specific requirements for the importation of fruits and vegetables. The regulations in 7 CFR 305 provide for the use of irradiation as a phytosanitary treatment for certain fruits and vegetables imported in the United States. The irradiation treatment provides protection against all insect pest including fruit flies, the mango seed weevil, and others.

Need and Use of the Information: APHIS will collect information using a compliance agreement, 30-day notification, labeling packaging, dosimetry recordings, requests for dosimetry device approval, recordkeeping, requests for facility approval, work plan, trust fund agreement, phytosanitary certificate, and denial and withdrawal certification. Without the collection of this information, APHIS would have no

practical way of determining that any given commodity had actually been irradiated. Irradiation leaves no residue and usually causes no discernible change to the commodity's color or texture.

Description of Respondents: Business or other for profit; Federal Government.

Number of Respondents: 63.

Frequency of Responses: Recordkeeping; Reporting: On occasion.

Total Burden Hours: 347.
